

# Palette audit

# every token tier, every theme

Each slide hardcodes the resolved hex values for one palette so the swatches show *that* palette regardless of the deck's active theme.

## KEY INSIGHT

⚠ The `--cat-*` categorical proposals here are SUPERSEDED (2026-07-16, #1022). They were scored under the retired "pale  $L \approx 87$  / deep  $L \approx 32$ , fixed non-flipping ink" model; the shipped categorical cycle is now the **three-layer contrast contract** (`engineering/decisions/2026-07-15-categorical-token-contract.md`, gated by `checkCatContrast`). Do not copy these `--cat-*` values into a new **theme** — copy a shipped three-layer block (indaco / cuoio) and re-hue it. The chart-palette scoring here is

**indaco** bg #FFFFFF · accent #006FA8 · text-heading #0A1628

# Palette proposals

## 5 strategies × 13 themes = 65 candidates

---

Each slide: 12 paired slots (hue shared between light + dark variants).

Light = pale fill + dark text contract (AA target 4.5:1 on theme text-heading).

Dark = deep fill + white text contract (AA target 4.5:1 on white).

Scores below each header report AA-text pass count, graphical-on-canvas pass count, min adjacency hue spread among the first 6 (higher = first 6 more distinct), brand affinity (lower = closer to brand hue), and hue coverage (higher = wider palette).

# Palette proposals

# ranked top-5 per theme • 13 themes • 65 candidates

---

Each slide: 12 paired slots (hue shared between light + dark variants).

Light = pale fill + dark text contract (AA target 4.5:1 on theme text-heading).

Dark = deep fill + white text contract (AA target 4.5:1 on white).

Composite score (0-100):

- AA-text light pass 30 pts
- AA-text dark pass 30 pts
- Graphical dark on bg 15 pts
- Adjacency 1-6  $\Delta H$  15 pts (60°+ = full credit)
- Brand affinity 5 pts (peaked at 75° — anchored but diverse)
- Hue coverage 5 pts (300°+ = full credit)

Slides are sorted within each theme: #1 is the highest scorer. The metric breakdown next to each ratio shows the points contributed by that axis.
