CHART · HUB-SPOKE · MODE: SKETCH

Hub-spoke now measures the hand face it paints.

Under `mode: sketch` the chart billed every character at a flat 0.66em. Digits and symbols paint wider than that, so values ran past their room and the hub's value reached the edge of its disc. A measured per-character table replaces the flat number.

FY2026 · PARTNER CHANNEL REVENUE

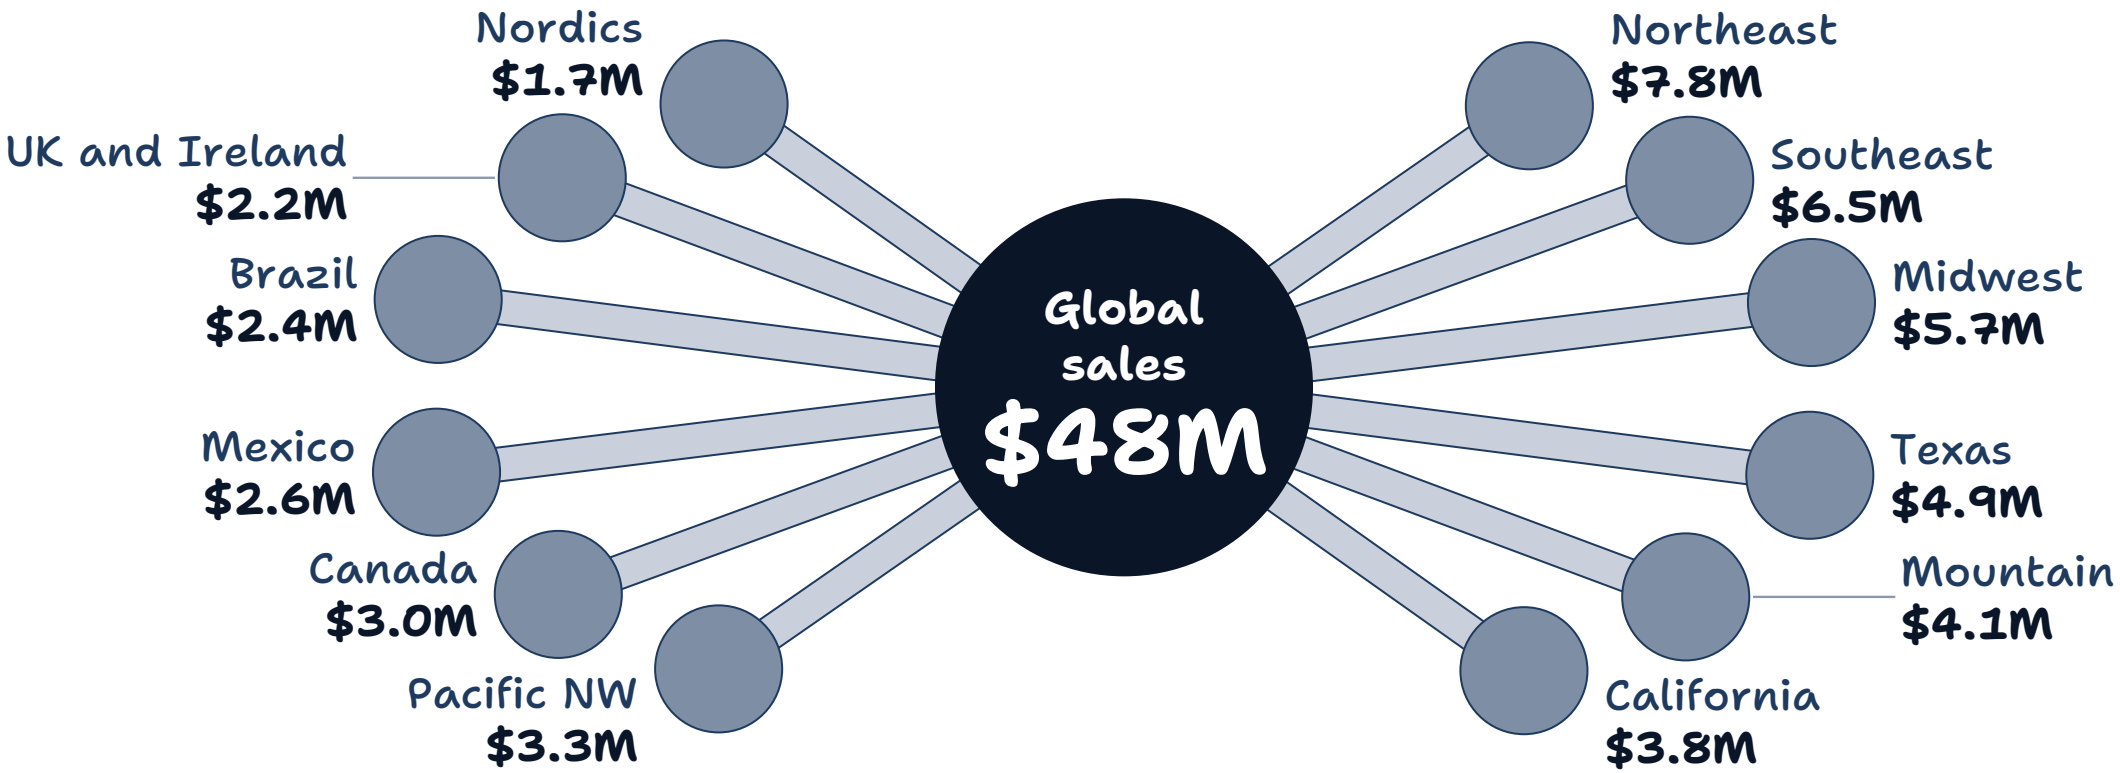

Two partners carry half of channel revenue.

Was: `$120M` reached 1.052 of the hub radius and `8%` painted 1.233× its estimate. Now: 0.936 and 0.94×.

REGIONAL SALES · BOOKINGS THIS QUARTER

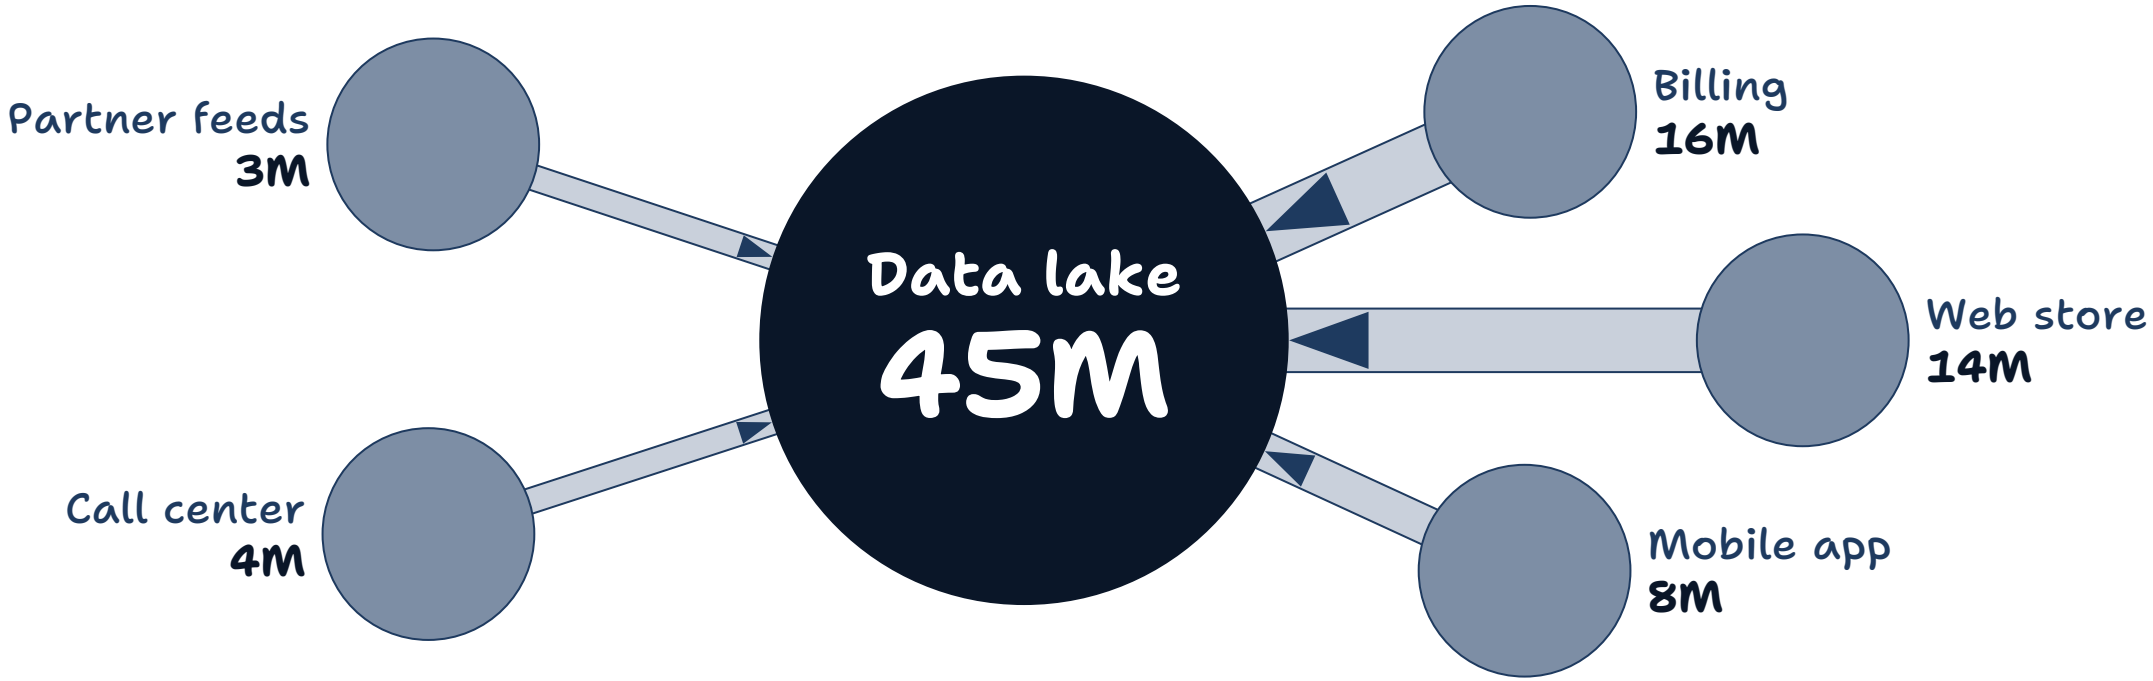

Twelve regions booked $48M; the top three brought in $20M.

Was: `$48M` reached 1.021 of the hub radius. Now: 0.912, with every value inside its estimate.

DATA PLATFORM · RECORDS PER DAY

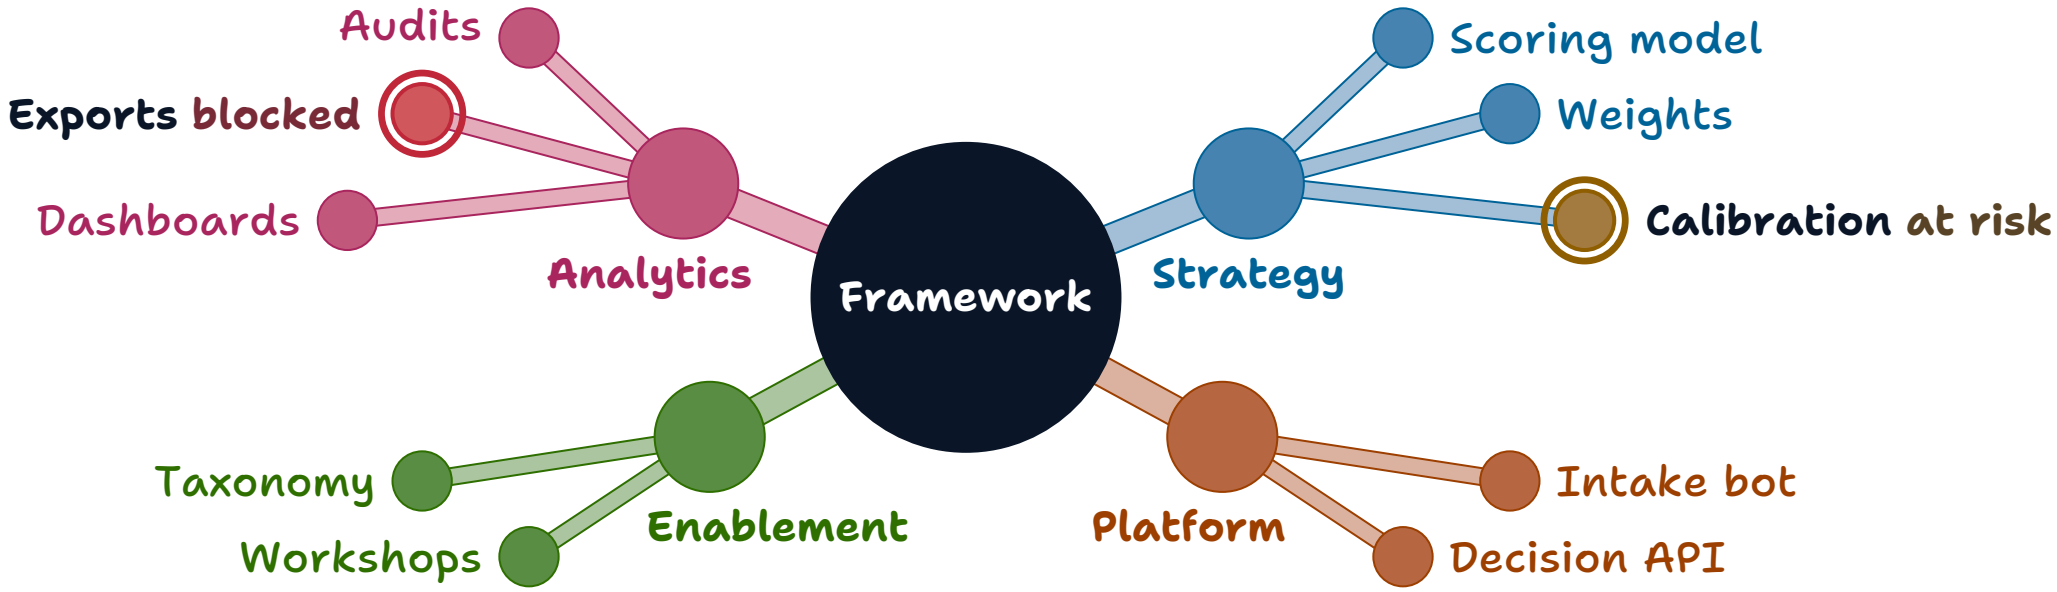

Billing and the web store send two thirds of what the lake takes in.

Was: `16M` and `14M` painted 1.190× their estimate, `8M` 1.270×. Now every value sits at 0.94–0.95×.

FRAMEWORK OWNERSHIP · 2026

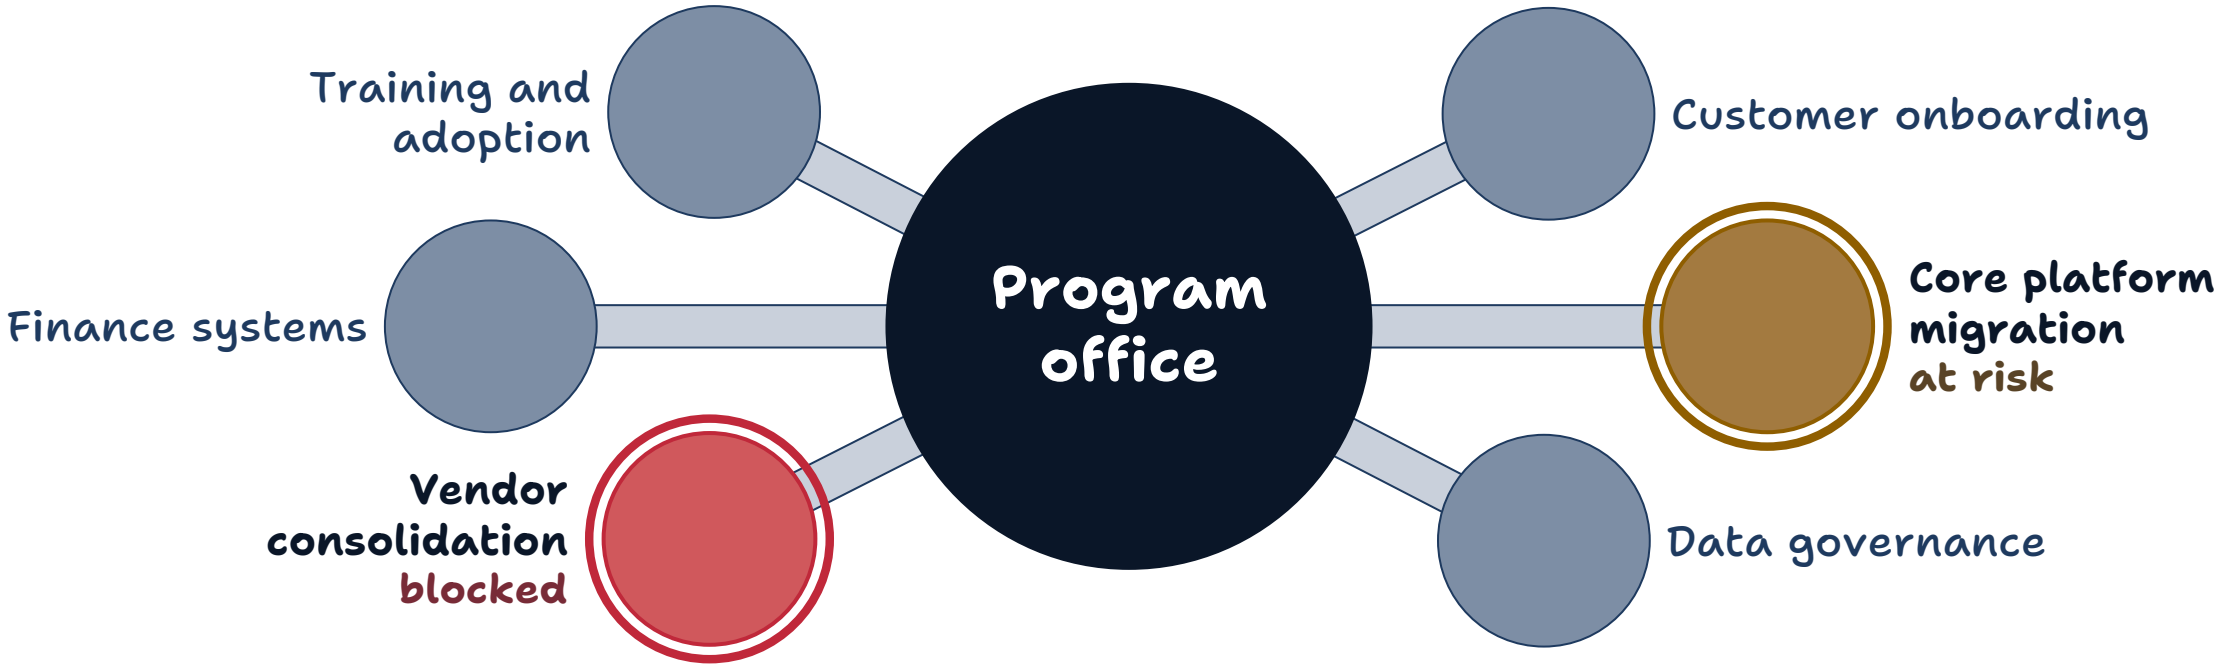

Four teams own the framework's ten moving parts.

Was: the hub printed `Framewor` over `k`. Now a smaller type size keeps the word whole.

TRANSFORMATION PROGRAM · Q3

Two of six workstreams are off track.

Names were billed 12% wide on the median; now 4%. Status words keep their tracking in the bill.

Measured, not guessed.

The table lives in `lib/core/hub-spoke-model.js` and rides the same font pin as the chart family's uppercase table. `npm run fonts:measure -- --check` re-measures it.
