

INVENTORY · LEDGER · STRUCTURE

# inventory

A parallel set of related items of similar weight — one content shape, four interchangeable looks.

# The inventory lists a system's parts.

---

## 01 One part per row.

A name and one clause of body.

---

## 02 Four parts reads best.

Five fits; six is the hard stop.

---

## 03 Bodies stay clauses.

Fourteen words soft, twenty-two hard.

---

## 04 Looks reskin the list.

cards, timeline, editorial change form, not content.

---

INVENTORY CARDS

# cards deals the parts into tiles.

---

**One part per row.**

A name and one clause of body.

**Four parts reads best.**

Five fits; six is the hard stop.

**Bodies stay clauses.**

Fourteen words soft, twenty-two hard.

**Looks reskin the list.**

cards, timeline, editorial change form, not content.

INVENTORY TIMELINE

# timeline strings the parts along a line.

---

1

**One part per row.**

A name and one clause of body.

2

**Four parts reads  
best.**

Five fits; six is the hard stop.

3

**Bodies stay clauses.**

Fourteen words soft, twenty-two  
hard.

4

**Looks reskin the list.**

cards, timeline, editorial change  
form, not content.

INVENTORY EDITORIAL

# editorial sets the parts as a column.

---

## One part per row.

A name and one clause of body.

## Four parts reads best.

Five fits; six is the hard stop.

## Bodies stay clauses.

Fourteen words soft, twenty-two hard.

## Looks reskin the list.

Same content, magazine form.

*The sidebar carries the register's one*

# The ledger clips past five full rows.

---

## 01 Part one.

Bodies stay short when the count is maxed.

---

## 02 Part two.

Matched shapes keep five rows scannable.

---

## 03 Part three.

The middle rows forgive the least.

---

## 04 Part four.

The sweet spot ended here.

---

## 05 Part five.

The last row that seats whole — the declared ceiling of six clips its body.

---

# The inventory lists a system's parts.

---

## 01 One part per row.

A name and one clause of body.

---

## 02 Four parts reads best.

Five fits; six is the hard stop.

---

## 03 Bodies stay clauses.

Fourteen words soft, twenty-two hard.

---

## 04 Looks reskin the list.

cards, timeline, editorial change form, not content.

---

# When NOT to reach for inventory.

## More than six items

The looks lose scannability past six entries (the cards/timeline looks past four). Escalate to list-tabular or split across slides.

## Ordered steps

If sequence carries meaning, use list-steps or list-criteria. inventory entries are parallel, of similar weight.

## Nested-bullet authoring

inventory takes an inline bold lead ( `- Lead. detail` ), not the nested `- Title / - body` shape that card-style components use.

## Lopsided density

Equalize the prose when one entry has three sentences and the rest have one — uneven density unbalances every look.

RELATED COMPONENTS

# See also.

`cards-grid` — you want a fixed cards grid with nested-bullet authoring

`list-steps` — the items carry an explicit sequence

`list-tabular` — more than six rows, or a meta column per row

`timeline-list` — a vertical dated timeline rather than a parallel register
