

COMPARISON • GRID • STRUCTURE

pricing

Side-by-side plan tiers with prices, feature checklists, and one recommended column.

Three tiers, one recommended column.

Starter
\$o

- ✓ The checklist rows compare
- ✗ Slashed rows mean not included
- ✗ Same rows on every tier

One line positions the tier.

MOST POPULAR

Growth
\$49 / mo

- ✓ The starred tier gets the accent
- ✓ Checks accumulate up the ladder
- ✗ One gap keeps it honest

The column buyers should read first.

Enterprise
Custom

- ✓ The top tier checks every row
- ✓ Custom replaces a number
- ✓ Nothing slashed up here

The ceiling of the ladder.

two sets a pair of plans head to head.

Self-serve

\$49 / mo

- ✓ Wider columns, more feature rows
- ⌚ The gap that motivates upgrading

The simple path.

Enterprise

Custom

- ✓ Everything in self-serve
- ✓ The rows that close deals

The guided path.

four compact fits the whole ladder.

The ceiling of the ladder.

When NOT to reach for pricing.

More than four tiers.

Five-plus columns shrink below readability and the price comparison collapses. Curate to the tiers that matter, or use

compare-table

for a dense feature-by-plan matrix.

Every tier marked popular.

Elevate exactly one tier. Two ribbons cancel out and the eye has nowhere to land — the whole point of the marker is a single recommendation.

Features that drift between tiers.

If each tier lists a different set of features, the columns can't be compared row-for-row. Keep the feature list and order identical; toggle `[x]` / `[/]` inclusion with

A wall of red 'not included'.

(muted, struck through)
Use `[/]` for an absent feature, not

[
]

(alarming empty/fail). A pricing table sells what's included; it shouldn't read as a list of denials.

RELATED COMPONENTS

See also.

`compare-table` — a dense feature-by-plan matrix with many rows, not a few highlighted features

`verdict-grid` — options scored on shared criteria, not priced tiers

`cards-grid` — parallel items with no price and no shared feature checklist

`decision` — the slide recommends one option outright rather than presenting a price ladder

`big-number` — a single headline price, not a tiered comparison
