# roadmap

Phased multi-workstream grid — phases across the top, workstreams down the side.

H2 2026 · ROLLOUT PLAN

# The roadmap grids workstreams against phases.

| WORKSTREAM | FOUNDATION        |  | HARDENING             |  | SCALE              |  |
|------------|-------------------|--|-----------------------|--|--------------------|--|

# When NOT to reach for roadmap.

## One workstream

A single row of phases is a `timeline` or `list-steps`, not a roadmap. Roadmap earns its grid only when at least two workstreams move in parallel.

## No state markers

A grid of bare deliverables loses half its value. Add `[x]` / `[-]` / `[ ]` / `[/]` so the audience reads progress alongside scope.

## Past five workstreams

More than five rows compresses cell text and the lane stripes lose their categorical read. Group adjacent workstreams or split by phase.

RELATED COMPONENTS

# See also.

`gantt` — continuous task bars across a date axis rather than discrete phase cells

`kanban` — current state by stage rather than phased schedule

`list-steps` — single workstream sequence without parallel lanes

`verdict-grid` — options scored against shared criteria, not phased delivery

`checklist` — single list with state markers, no workstream dimension
