# logo-wall

A grid of customer, partner, or funder logos as social proof.

# The logo wall seats the marks with captions.

|                                                                                                                                                |                                                                                                                                                 |                                                                                                                                                      |                                                                                                                                                  |

# When NOT to reach for logo-wall.

## Names that need a sentence

If each entity needs a role, a quote, or a metric beside it, this is the wrong layout. Use `actors` (who owns what), `cards-grid` (a short body per item), or `quote` (a single testimonial).

## Logos nobody recognises

A wall of unknown marks proves nothing and asks the audience to squint. If the names don't carry on sight, state the count as a `big-number` ('400+ teams') instead.

## Mismatched raster art

The mark is rendered as a silhouette (a CSS mask / inline SVG), so it must be clean vector with real transparency — a raster PNG or a logo whose negative space is a white fill won't read. Source SVG marks drawn as filled shapes; color is supplied by the palette token, not the file.

RELATED COMPONENTS

# See also.

`actors` — each named entity owns a responsibility, not just lends its logo

`cards-grid` — each item needs a line of body text, not just a mark

`big-number` — the proof is a count ('400+ teams'), not the individual marks

`quote` — one customer's testimonial carries the slide

`image` — a single visual, not a grid of marks, is the evidence
