LATTICE · FEATURE DECK

The agenda writes itself.

Leave the list out, and the deck's dividers fill it in.

Four parts, one decision.

01 The quarter in four numbers

02 Where growth came from

03 The SMB segment: keep, fix, or exit

04 What we ask the board to approve

SECTION 01

The quarter in four numbers.

The agenda you just saw has no list in its source.

The slide says `agenda` and a heading, and nothing else

The engine lists each `divider` heading in deck order, without the closing period

Write any list of your own and it wins, untouched

SECTION 02

Where growth came from.

Here is where we are.

1. The quarter in four numbers
2. **Where growth came from**
3. The SMB segment: keep, fix, or exit
4. What we ask the board to approve

SECTION 03

The SMB segment: keep, fix, or exit.

Two parts done, one to decide.

- [x] The quarter in four numbers
- [x] Where growth came from
- [→] **The SMB segment: keep, fix, or exit**
- [ ] What we ask the board to approve

SECTION 04

What we ask the board to approve.

Three styles, one source.

The ledger reads as a contents page, `circles` as a track of stops, and `checks` as done, here and ahead.
