When NOT to reach for regulatory-update.

Single rule's lineage.

If the slide walks one rule from statute through case, use

authority-chain

. regulatory-update is a period digest.

Past six rows.

More than six items compresses the row gap and the citation chips run out of room. Split by jurisdiction.

Missing summary or citation.

Each row needs all three sub-items — citation, summary, effective date. Otherwise the row reads as rumor.

RELATED COMPONENTS

See also.

`authority-chain` — single rule walked statute → regulation → guidance → case

`list-criteria` — flat enumeration of requirements without dates or citations

`list-steps` — lighter dots-on-a-spine sequence — the `timeline` variant

`list-tabular` — structured metadata per row but no regulatory framing
