

Pricing and `STATE-CELLS` tables used to draw the empty box differently from the rest of the deck.

FIX DEMO · STATE MARKERS

**An empty box means the
same thing everywhere.**

The universal reading: an open ring means "not yet".

Done draws a green check

Partial draws an amber dash

Not started draws a gray open ring

Out of scope draws a slash, struck through

Pricing now draws the same open ring.

Starter

Single sign-on

Every row checked.

Tables with state-cells draw the ring in gray again.

CAPABILITY	STARTER	GROWTH	ENTERPRISE
Workspace			
Seats			
Audit log			
SSO			

The ring had kept `--text-label`, which is accent-colored. It now uses `--muted-mark`, like every other open ring.

Inline marks were already right, and now they match.

- Audit log on Starter  — open ring, not started
- Seat limit on Starter  — amber dash, partial
- SSO on Growth  — slash, out of scope

A mark written in a sentence, a table cell and a pricing card now all draw the same shape.

Verdict-grid is the one place an empty box means "not met".

Vendor North

✓ Speed ✗ Auditability ✓ Adoption

Fast and adopted, but fails the audit.

Vendor South

✓ Speed ✓ Auditability — Adoption

Passes the audit. Adoption is partial.

STATE MARKERS • ONE VOCABULARY

Learn the four marks once.

Only verdict-grid reads an empty box as a failure, because a verdict scores against a bar.
