

CHART · HUB-SPOKE · MODE: SKETCH

Hub-spoke now measures the hand face it paints.

Under `mode: sketch` the chart billed every character at a flat 0.66em. Digits and symbols paint wider than that, so values ran past their room and the hub's value reached the edge of its disc. A measured per-character table replaces the flat number.

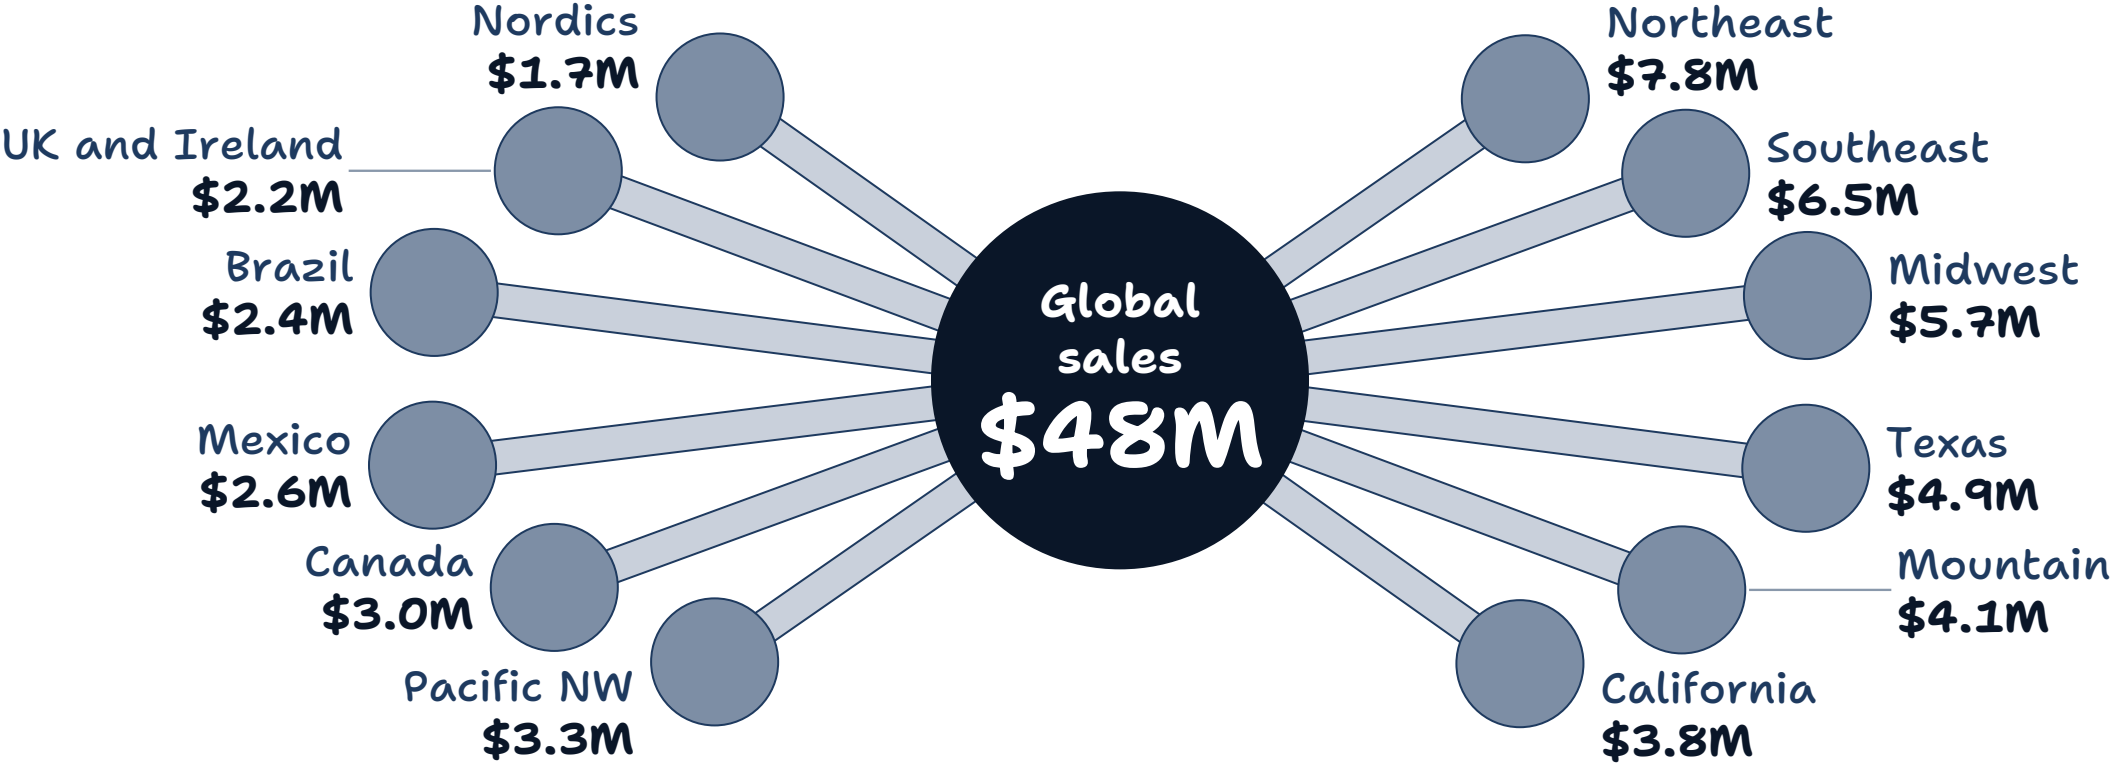

FY2026 · PARTNER CHANNEL REVENUE

Two partners carry half of channel revenue.

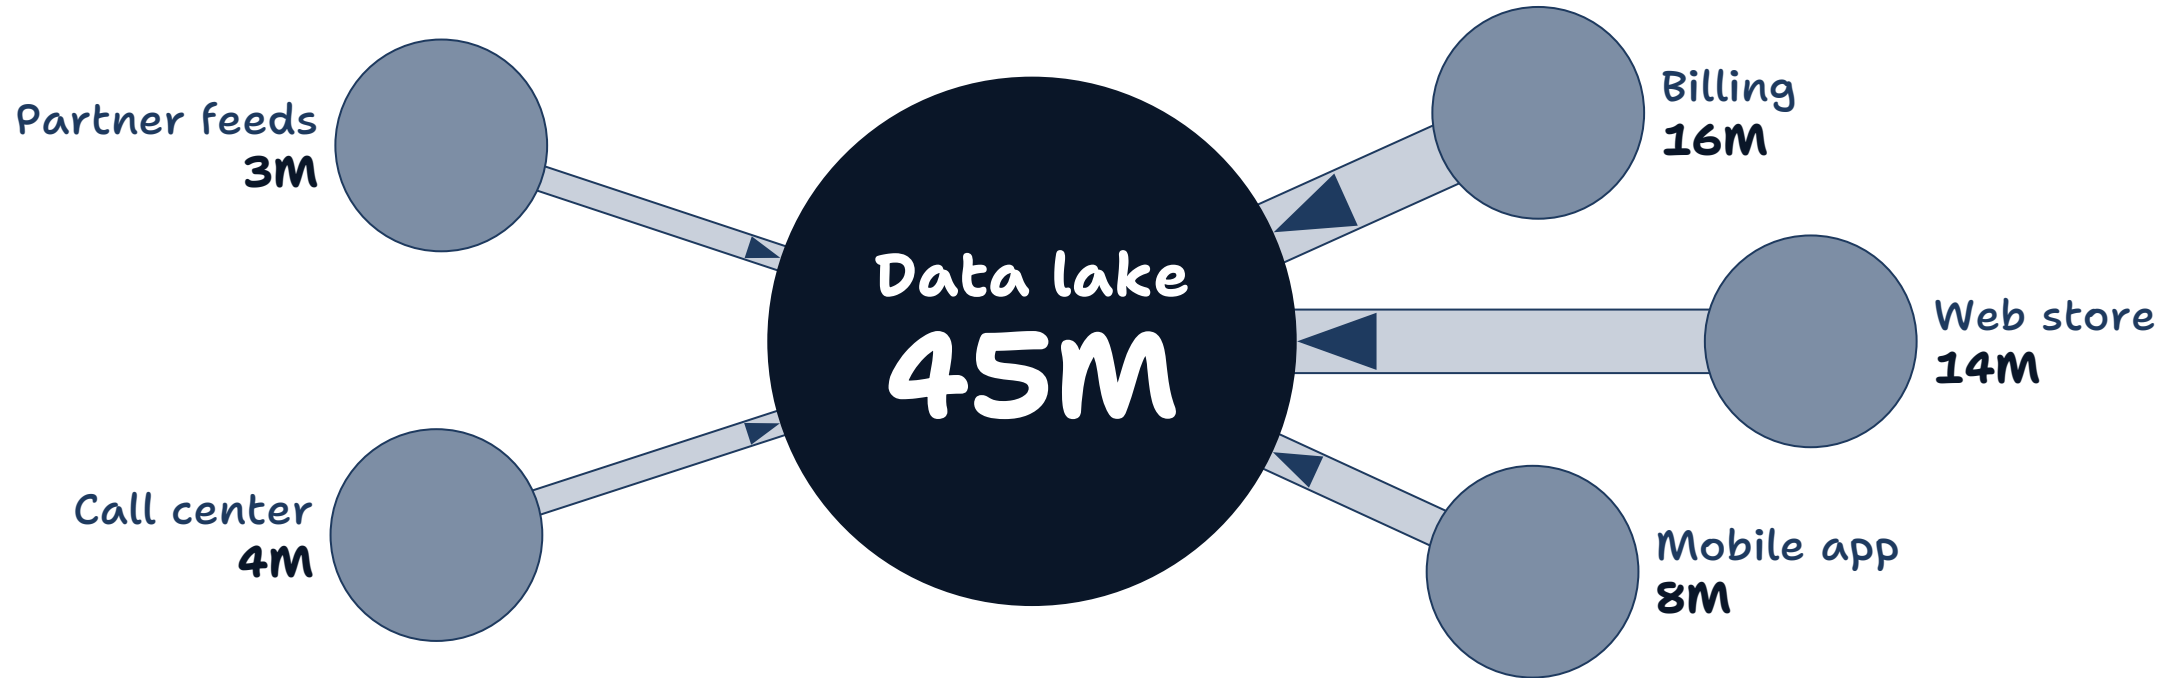

REGIONAL SALES · BOOKINGS THIS QUARTER

Twelve regions booked \$48M; the top three brought in \$20M.

DATA PLATFORM · RECORDS PER DAY

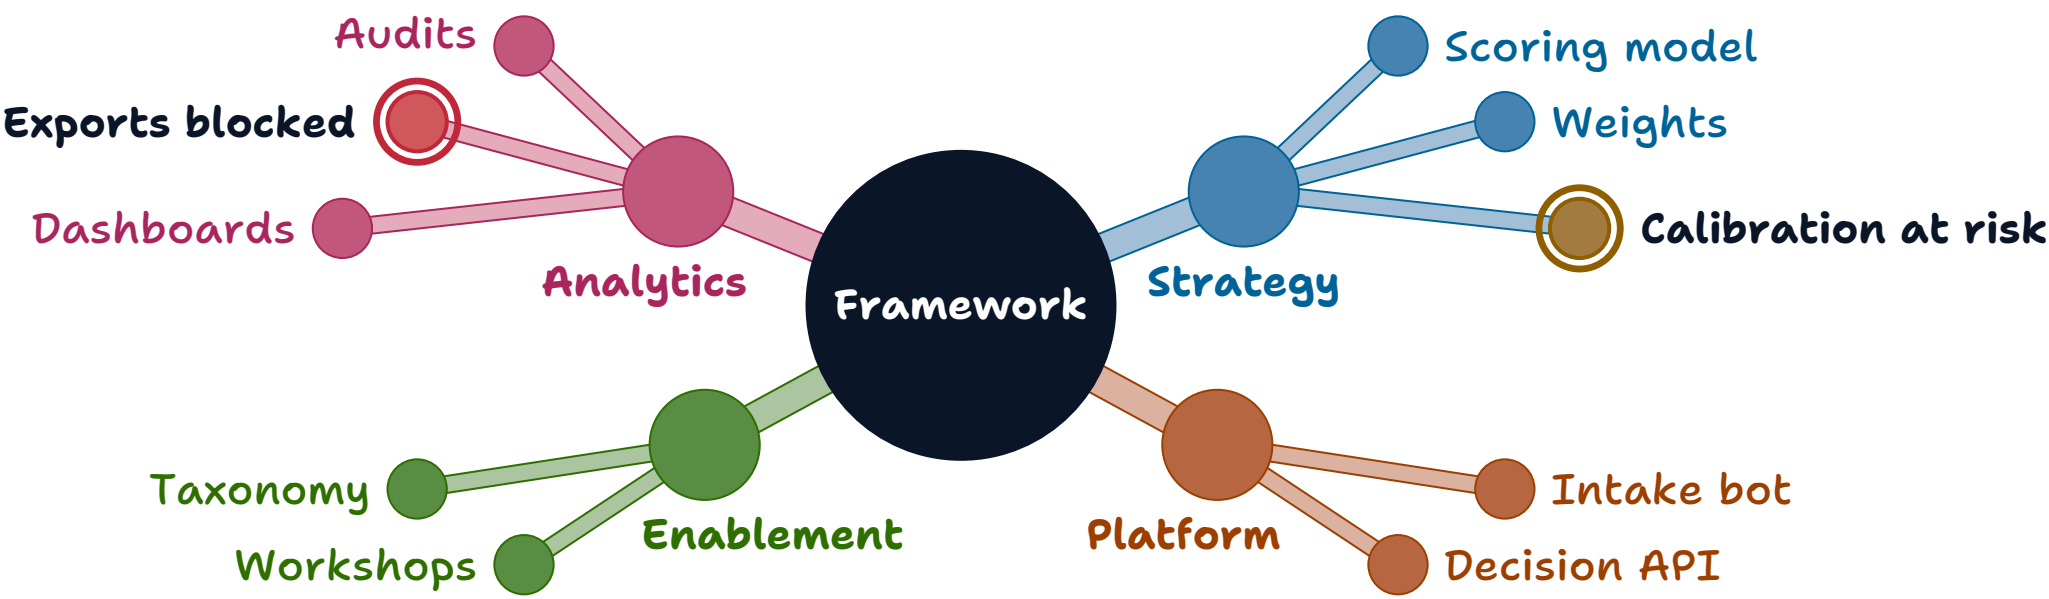

Billing and the web store send two thirds of what the lake takes in.

Was: 16M and 14M painted 1.190x their estimate, 8M 1.270x. Now every value sits at 0.94–0.95x.

FRAMEWORK OWNERSHIP · 2026

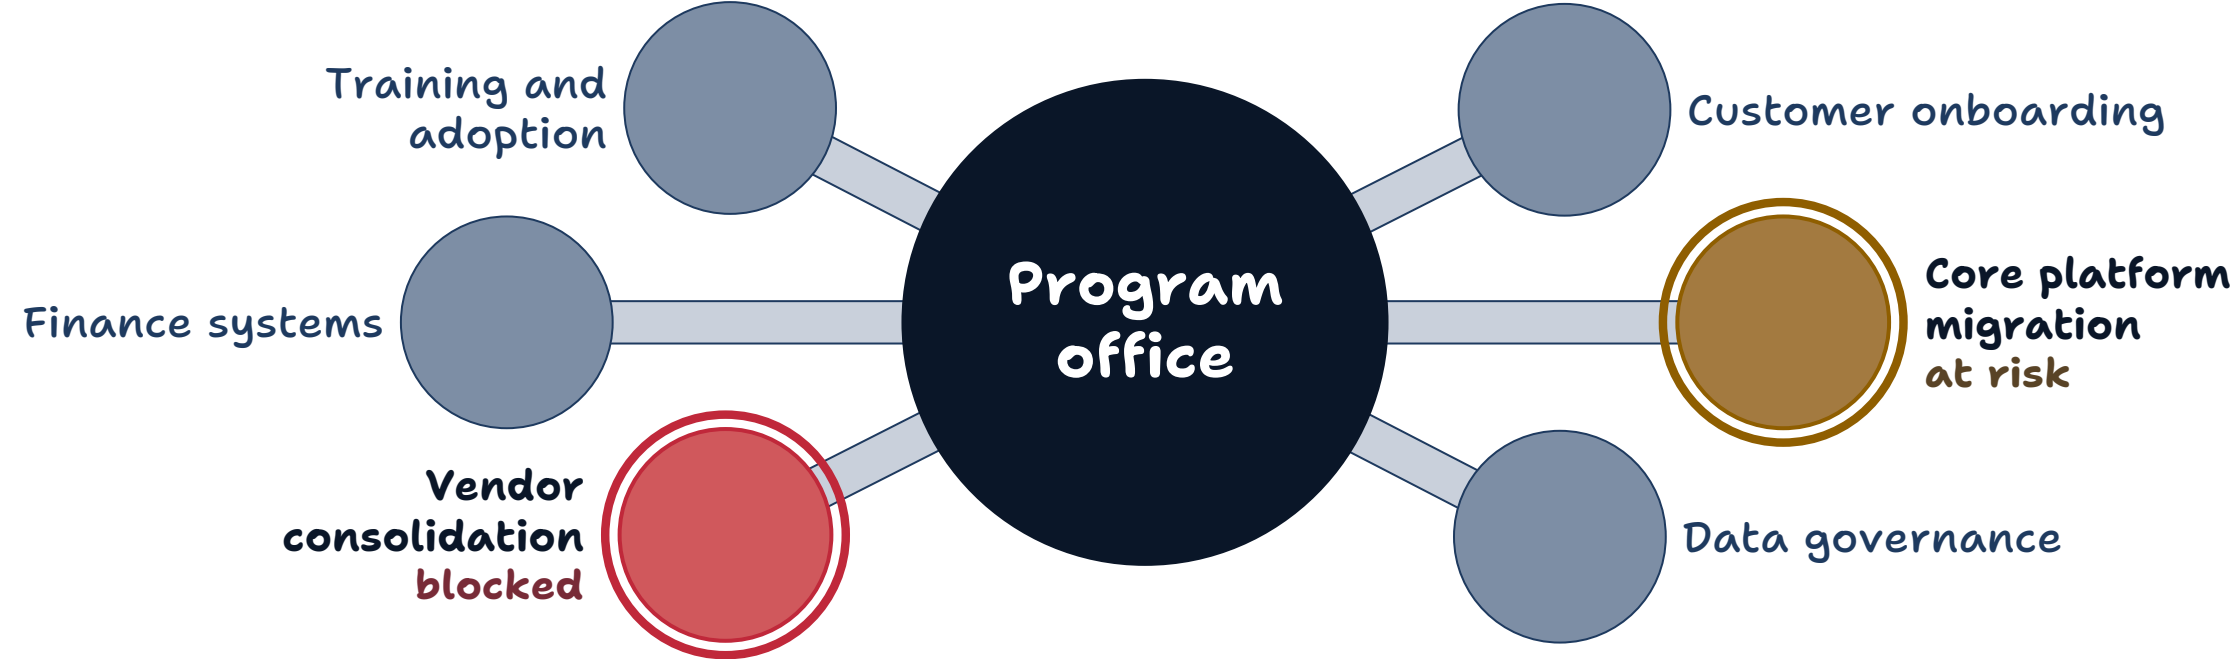

Four teams own the framework's ten moving parts.

Was: the hub printed `Framework` over `k`. Now a smaller type size keeps the word whole.

TRANSFORMATION PROGRAM · Q3

Two of six workstreams are off track.

Measured, not guessed.

The table lives in `lib/core/hub-spoke-model.js` and rides the same font pin as the chart family's uppercase table. `npm run fonts:measure -- --check` re-measures it.
