

STATIC PALETTE COMPILATION

Charts in full colour, on every browser

Every chart colour compiles to a flat literal at build time — so the same bytes paint correctly on a modern engine and on old Safari / smart-TV Chromium.

The categorical spectrum reads cleanly

SHARE OF PIPELINE

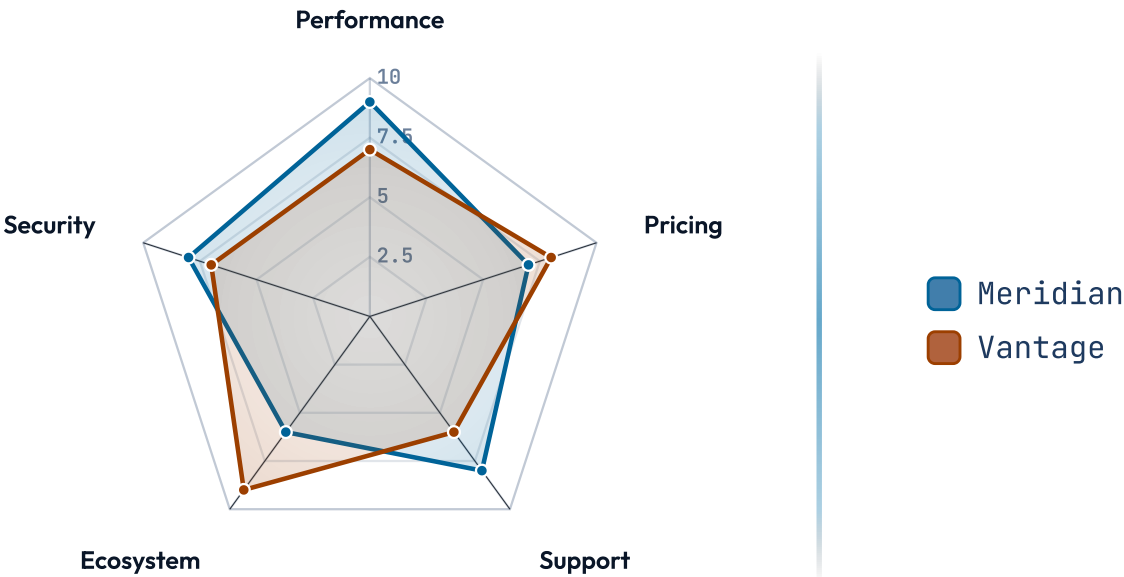

2026 Q1 .. 2026 Q4 today Q3

Status colour carries meaning, not decoration

Workstream		Q1	Q2	Q3	Q4
Framework	Signal taxonomy	live	Scoring model v2 live	Per-team weighting warn	·
Adoption	Pilot onboarding	live	·	Org-wide rollout GA decision	·

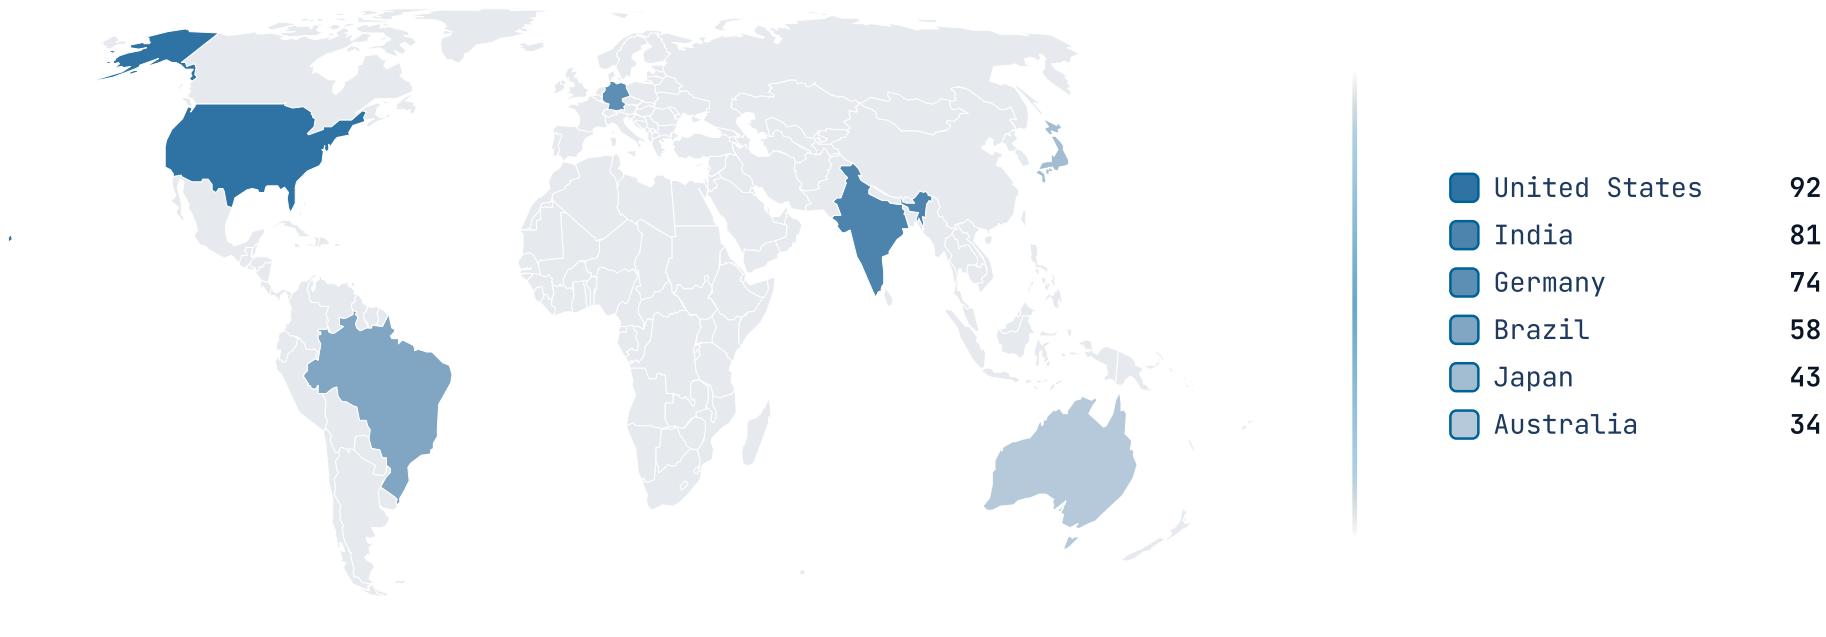

Translucent area fills stay true per canvas

SCALE · 0-10

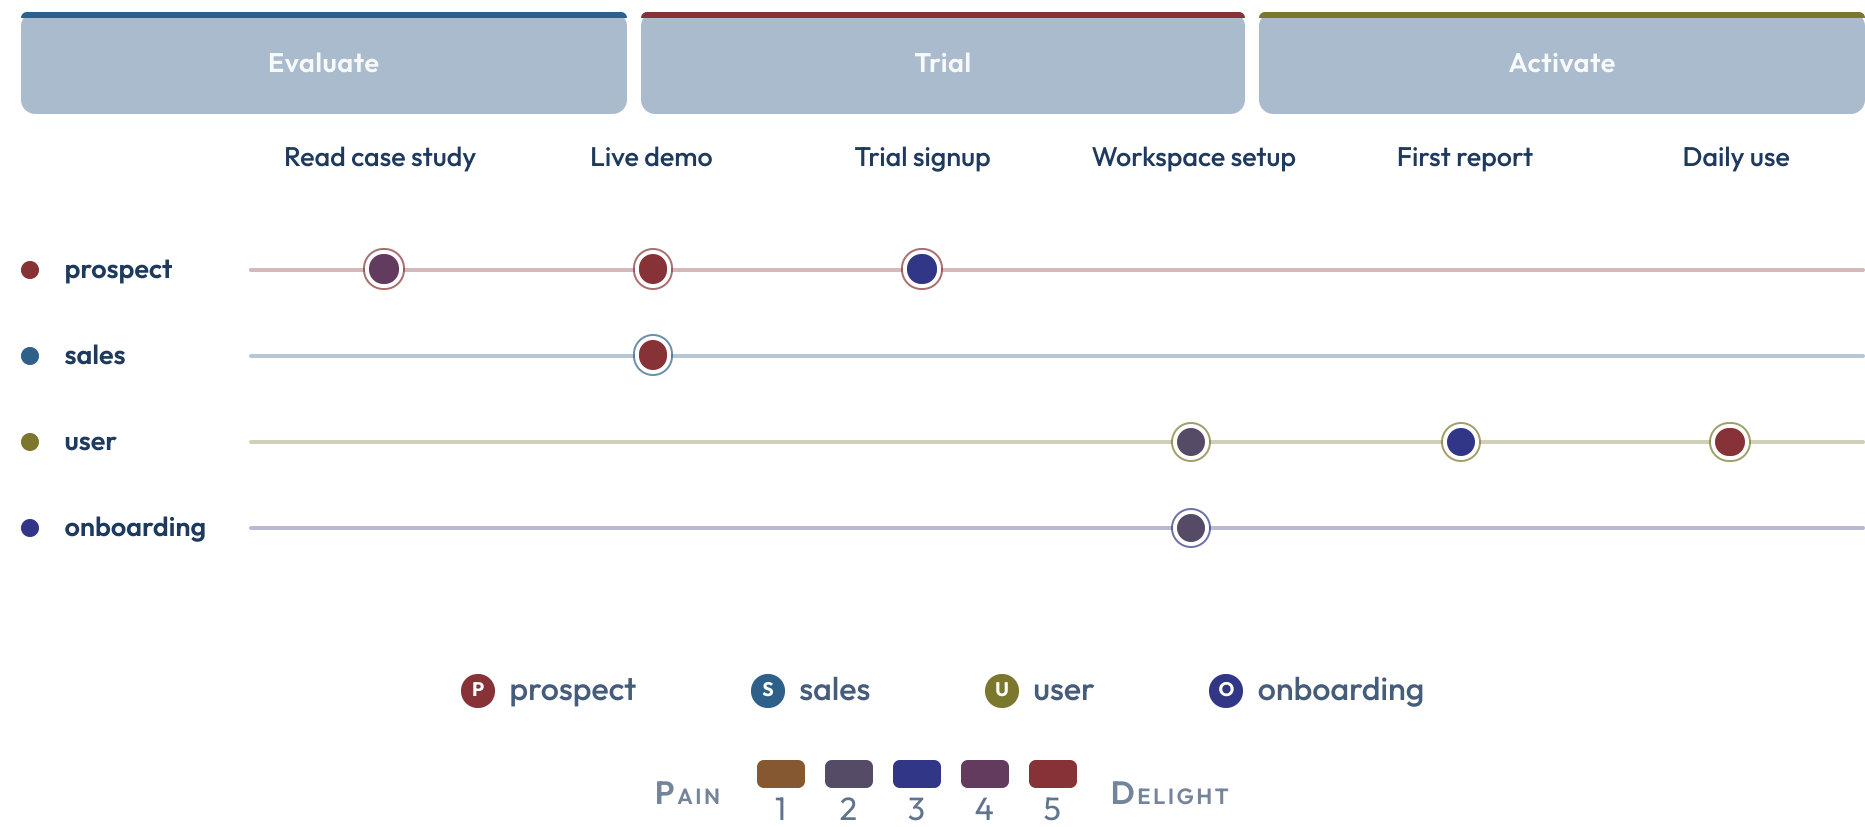

The choropleth ramp quantizes to sixteen steps

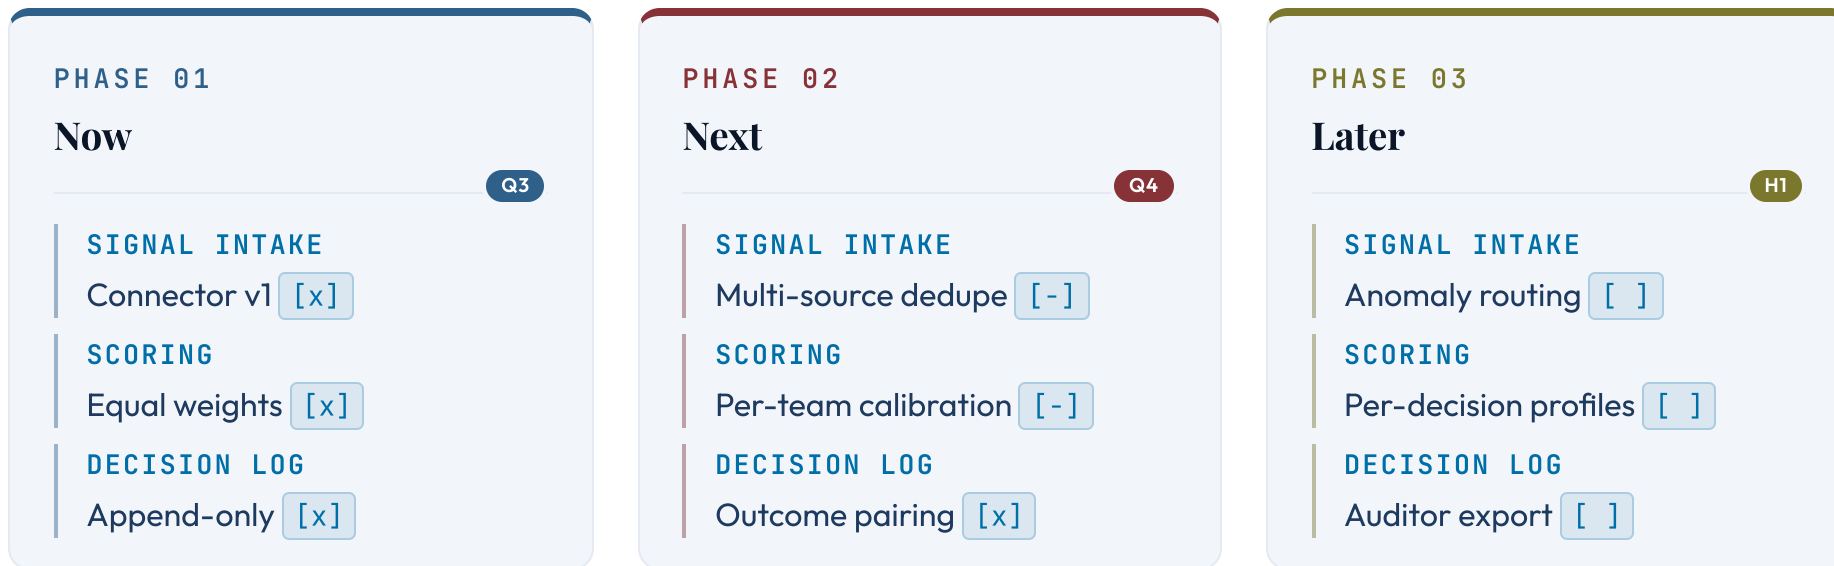

ADOPTION BY REGION

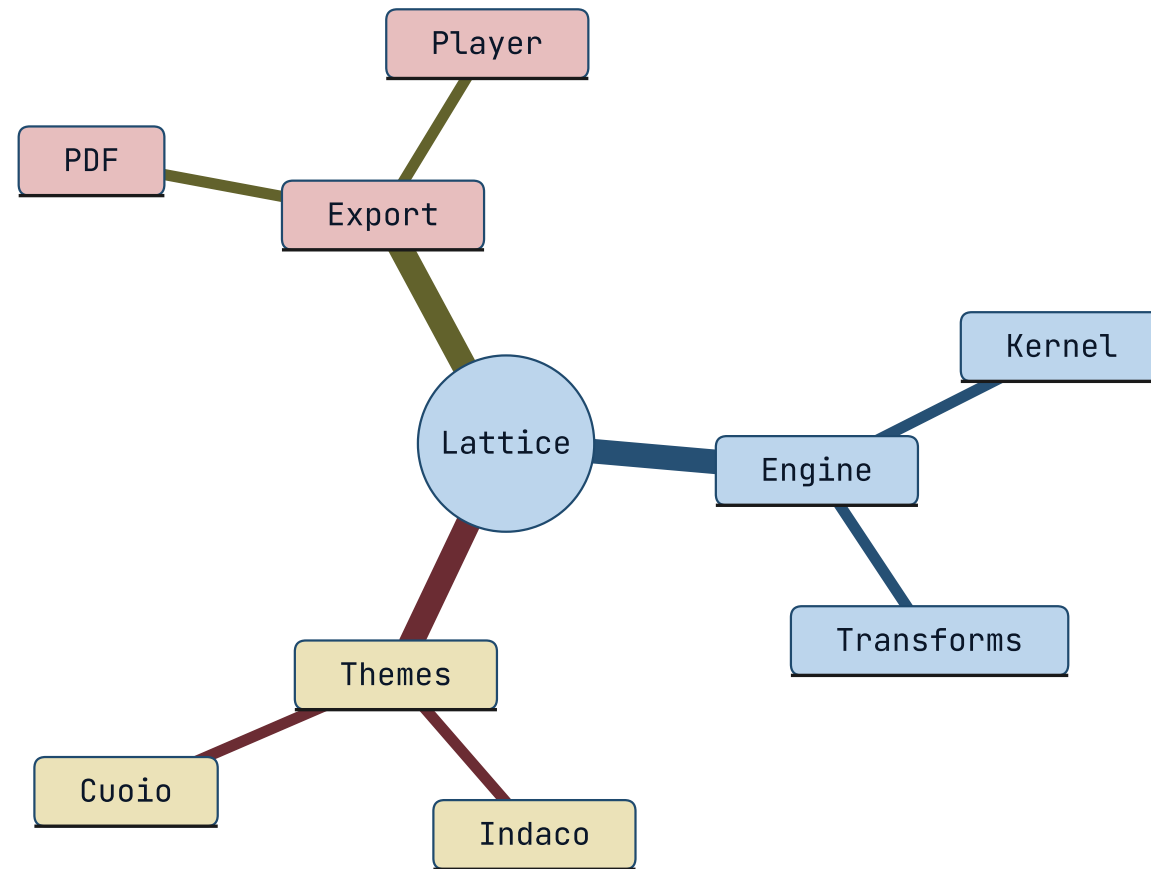

Actor lanes and mood dots keep their hue

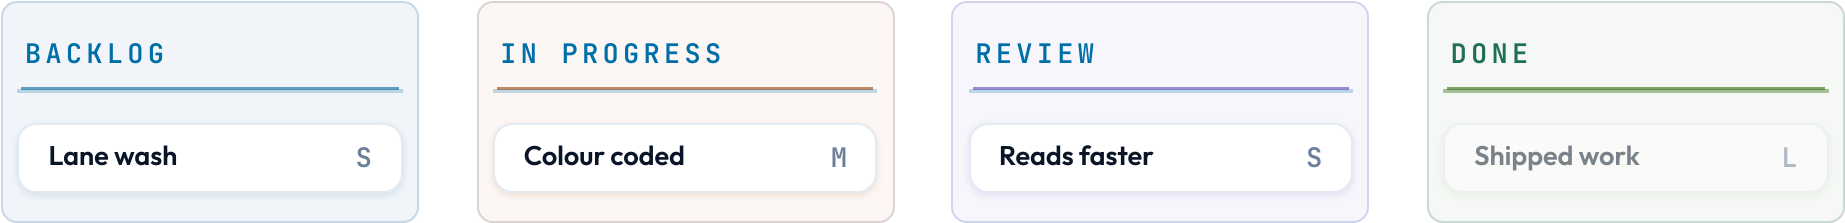

Phase accents ride the fixed categorical rotation

Mermaid branches paint from the same palette

Tinted lanes and premium tiles lift cleanly

Edit a hue once, in the `chart-palette-recipe` region; the compiler resolves it to two flat planes per theme, a build gate keeps every paint flat, and modern and old browsers run byte-identical chart CSS.
