

NEW COMPONENT · INVENTORY · STACK · STRUCTURE

The questions we know are coming.

The end-of-pitch slide that pre-empts the room — the three or four hardest questions the audience will raise, each met with a prepared answer. The question reads as a prompt; the answer carries the substance.

A few defended answers, not a help page.

Q&A is a *function*, not a flat list: you close the objection on your own terms. Author it nested — the top-level item is the question, the answer sits under it.

- Questions are indexed automatically, so `ul` and `ol` render the same.
- Five looks: the editorial **ledger** (default), `spine`, `rail`, `tab`, `grid`, plus universal `solo`, `compact`, `dark`.
- Distinct from a reference `faq` (terse look-ups) and `list-criteria` (criteria you score). q-and-a *defends* a recommendation.

What the board will press on.

01 Why not extend the current vendor one more year?

The renewal lands in Q3 and locks us in through 2028. Switching now costs a single quarter of migration; switching after renewal costs three.

02 What happens to the team mid-migration?

No headcount change. The same four engineers run both stacks through the eight-week overlap, then the legacy stack is decommissioned.

03 How confident are we in the savings?

The \$1.2M is contracted, not projected — the signed rate differential, before any usage growth.

SPINE — A SEQUENTIAL WALKTHROUGH

Take the objections in order.

- **Why not extend the current vendor one more year?**

The renewal lands in Q3 and locks us in through 2028. Switching now costs a single quarter; switching after renewal costs three.

- **What happens to the team mid-migration?**

No headcount change. The same four engineers run both stacks through the eight-week overlap, then the legacy stack is decommissioned.

- **How confident are we in the savings?**

The \$1.2M is contracted, not projected — the signed rate differential, before any usage growth.

The exhibit version.

1	Why not extend the current vendor one more year?	The renewal locks us in through 2028. Switching now costs one quarter; after renewal, three.
2	What happens to the team mid-migration?	No headcount change — four engineers run both stacks through the eight-week overlap.
3	How confident are we in the savings?	The \$1.2M is contracted, not projected — the signed rate differential.

TAB — UNDERLINED PROMPTS

The most editorial read.

Why not extend the current vendor one more year?

The renewal locks us in through 2028. Switching now costs a quarter; switching after renewal costs three.

What happens to the team mid-migration?

No headcount change. The same four engineers run both stacks through the eight-week overlap.

How confident are we in the savings?

The \$1.2M is contracted, not projected — the signed rate differential.

When you have a fourth.

01

Why not extend the current vendor one more year?

The renewal locks us in through 2028; after renewal it costs three quarters.

02

What happens to the team mid-migration?

No headcount change. Four engineers run both stacks through the eight-week overlap.

03

How confident are we in the savings?

The \$1.2M is contracted, not projected — the signed rate differential.

04

What is the rollback plan?

A one-command revert to the pinned release, rehearsed weekly in staging.

SOLO — ONE QUESTION, THE WHOLE SLIDE

The one we know is coming.

01 If the pilot fails, what have we actually lost?

One quarter and \$180K, fully recoverable. The contract caps exposure at the pilot scope, with no auto-renewal and a thirty-day exit. The downside is bounded; the upside is the whole thesis.

COMPACT — FIVE-PLUS PAIRS

Five we expect, numbered and tightened.

01 Why now rather than next fiscal year?

The incentive credits expire in December; waiting forfeits \$400K.

02 What is the rollback plan?

A one-command revert to the pinned release, rehearsed weekly in staging.

03 Who signs off on go-live?

The change-advisory board, the Thursday before each wave.

04 How does this affect the SLA?

The 99.9% target holds — the migration runs behind a feature flag.

05 What if adoption stalls?

Usage is opt-in for thirty days with a fallback, so a stall costs time, not money.

Q - AND - A

Pre-empt the room.

*When the hard questions are predictable,
answer them before they are asked.*
