

PROGRESSION • TIMELINE • STRUCTURE

list-steps

Horizontal row of ordered step cards, each with a full description body (the `vertical` variant stacks them instead).

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and
one clause of body.

STEP 02

Keep steps parallel

Same shape every
step, or sequence
breaks.

STEP 03

Number honestly

Order is the promise
this layout makes.

STEP 04

Stop at five

Six fits; seven is two
slides.

vertical stacks the steps down the page.

STEP 01

First

Three steps demo a look best.

STEP 02

Second

The look changes; the grammar holds.

STEP 03

Third

Body budgets do not move.

Make the case, one stage at a time.

Many concerns narrow onto one plan.

PROBLEM

Define the problem that is causing the pain.

VISION

Show what the world looks like once it is solved.

APPROACH

Detail the moves that get from here to there.

PLAN

Commit to concrete steps, owners, and a date.

The argument, stated plainly.

PROBLEM

Define the problem that is causing the pain.

VISION

Show what the world looks like once it is solved.

APPROACH

Detail the moves that get from here to there.

PLAN

Commit to concrete steps, owners, and a date.

timeline strings the steps along a line.

phase blocks each step as an era.

PHASE 01

First

Three steps demo a look best.

PHASE 02

Second

The look changes; the grammar holds.

PHASE 03

Third

Body budgets do not move.

milestone marks the steps as checkpoints.

MILESTONE A

First

Three steps demo a look best.

MILESTONE B

Second

The look changes; the grammar holds.

MILESTONE C

Third

Body budgets do not move.

lettered counts the steps with letters.

STEP A

First

Three steps demo a look best.

STEP B

Second

The look changes; the grammar holds.

STEP C

Third

Body budgets do not move.

stage prefixes each step with its stage tag.

STAGE 01

First

Three steps demo a look best.

STAGE 02

Second

The look changes; the grammar holds.

STAGE 03

Third

Body budgets do not move.

rank reads the numbers as standings.

RANK 01

First

Three steps demo a look best.

RANK 02

Second

The look changes; the grammar
holds.

RANK 03

Third

Body budgets do not move.

tier renders the steps as service tiers.

TIER I

First

Three steps demo a look best.

TIER II

Second

The look changes; the grammar holds.

TIER III

Third

Body budgets do not move.

roman counts the phases in numerals.

PHASE I

First

Three steps demo a look best.

PHASE II

Second

The look changes; the grammar holds.

PHASE III

Third

Body budgets do not move.

Turn the framework into a habit.

STEP 01

Name it

Say the verb and the reach you operate at today.

STEP 02

Pick the next move

One deeper verb, or the same verb carried wider.

STEP 03

Keep the evidence

A doc, a metric, a postmortem — proof the shift happened.

Six steps is the last honest sequence.

STEP 01

**Open at
full
strength**

A step at
the hard
budget
carries a
verb, its
object,
and the
one

STEP 02

**Hold the
parallel
line**

Six steps
survive
only when
every title
starts with
a verb and
every
body stays

STEP 03

**Front-
load the
risk**

The
contested
step
belongs in
the top
half.

STEP 04

**Shorten
as you
descend**

The
reader is
walking,
not
studying.

STEP 05

**Mark the
soft
ceiling**

Five was
it; this row
is
borrowed
room.

STEP 06

Stop

A seventh
step is a
second
slide.

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and
one clause of body.

STEP 02

Keep steps parallel

Same shape every
step, or sequence
breaks.

STEP 03

Number honestly

Order is the promise
this layout makes.

STEP 04

Stop at five

Six fits; seven is two
slides.

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and
one clause of body.

STEP 02

Keep steps parallel

Same shape every step,
or sequence breaks.

STEP 03

Number honestly

Order is the promise
this layout makes.

STEP 04

Stop at five

Six fits; seven is two
slides.

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and
one clause of body.

STEP 02

Keep steps parallel

Same shape every
step, or sequence
breaks.

STEP 03

Number honestly

Order is the promise
this layout makes.

STEP 04

Stop at five

Six fits; seven is two
slides.

When NOT to reach for list-steps.

Light labels, no body

If each step is a single label with no description, use the `timeline` variant (dots on a spine). The default step cards earn their chrome only when the body adds substance.

Parallel options

If the rows are alternatives the audience compares, use `cards-grid` or `verdict-grid`. The numbered prefix here reads as sequence — using it for parallel items mis-cues the audience.

Author-typed step numbers

Don't write `**STEP 01**` into the markdown. The badge is CSS-generated from the `ol` counter; manual numbering double-stamps and breaks on reordering.

RELATED COMPONENTS

See also.

`list-criteria` — gating requirements rather than a sequence of actions

`split-panel` — phase label + heading on the left, steps on the right

`roadmap` — phased grid across multiple workstreams

`list` — tenets or values (the `principles` variant) rather than a sequence

`funnel` — a value-driven funnel with conversion percentages, rather than the qualitative `converge` variant
