

The default card sits bottom left.

Solid, medium, theme ink. Every control below changes one thing about it.

card-sm, top right.

The small card steps the type down, so the photo carries the slide.

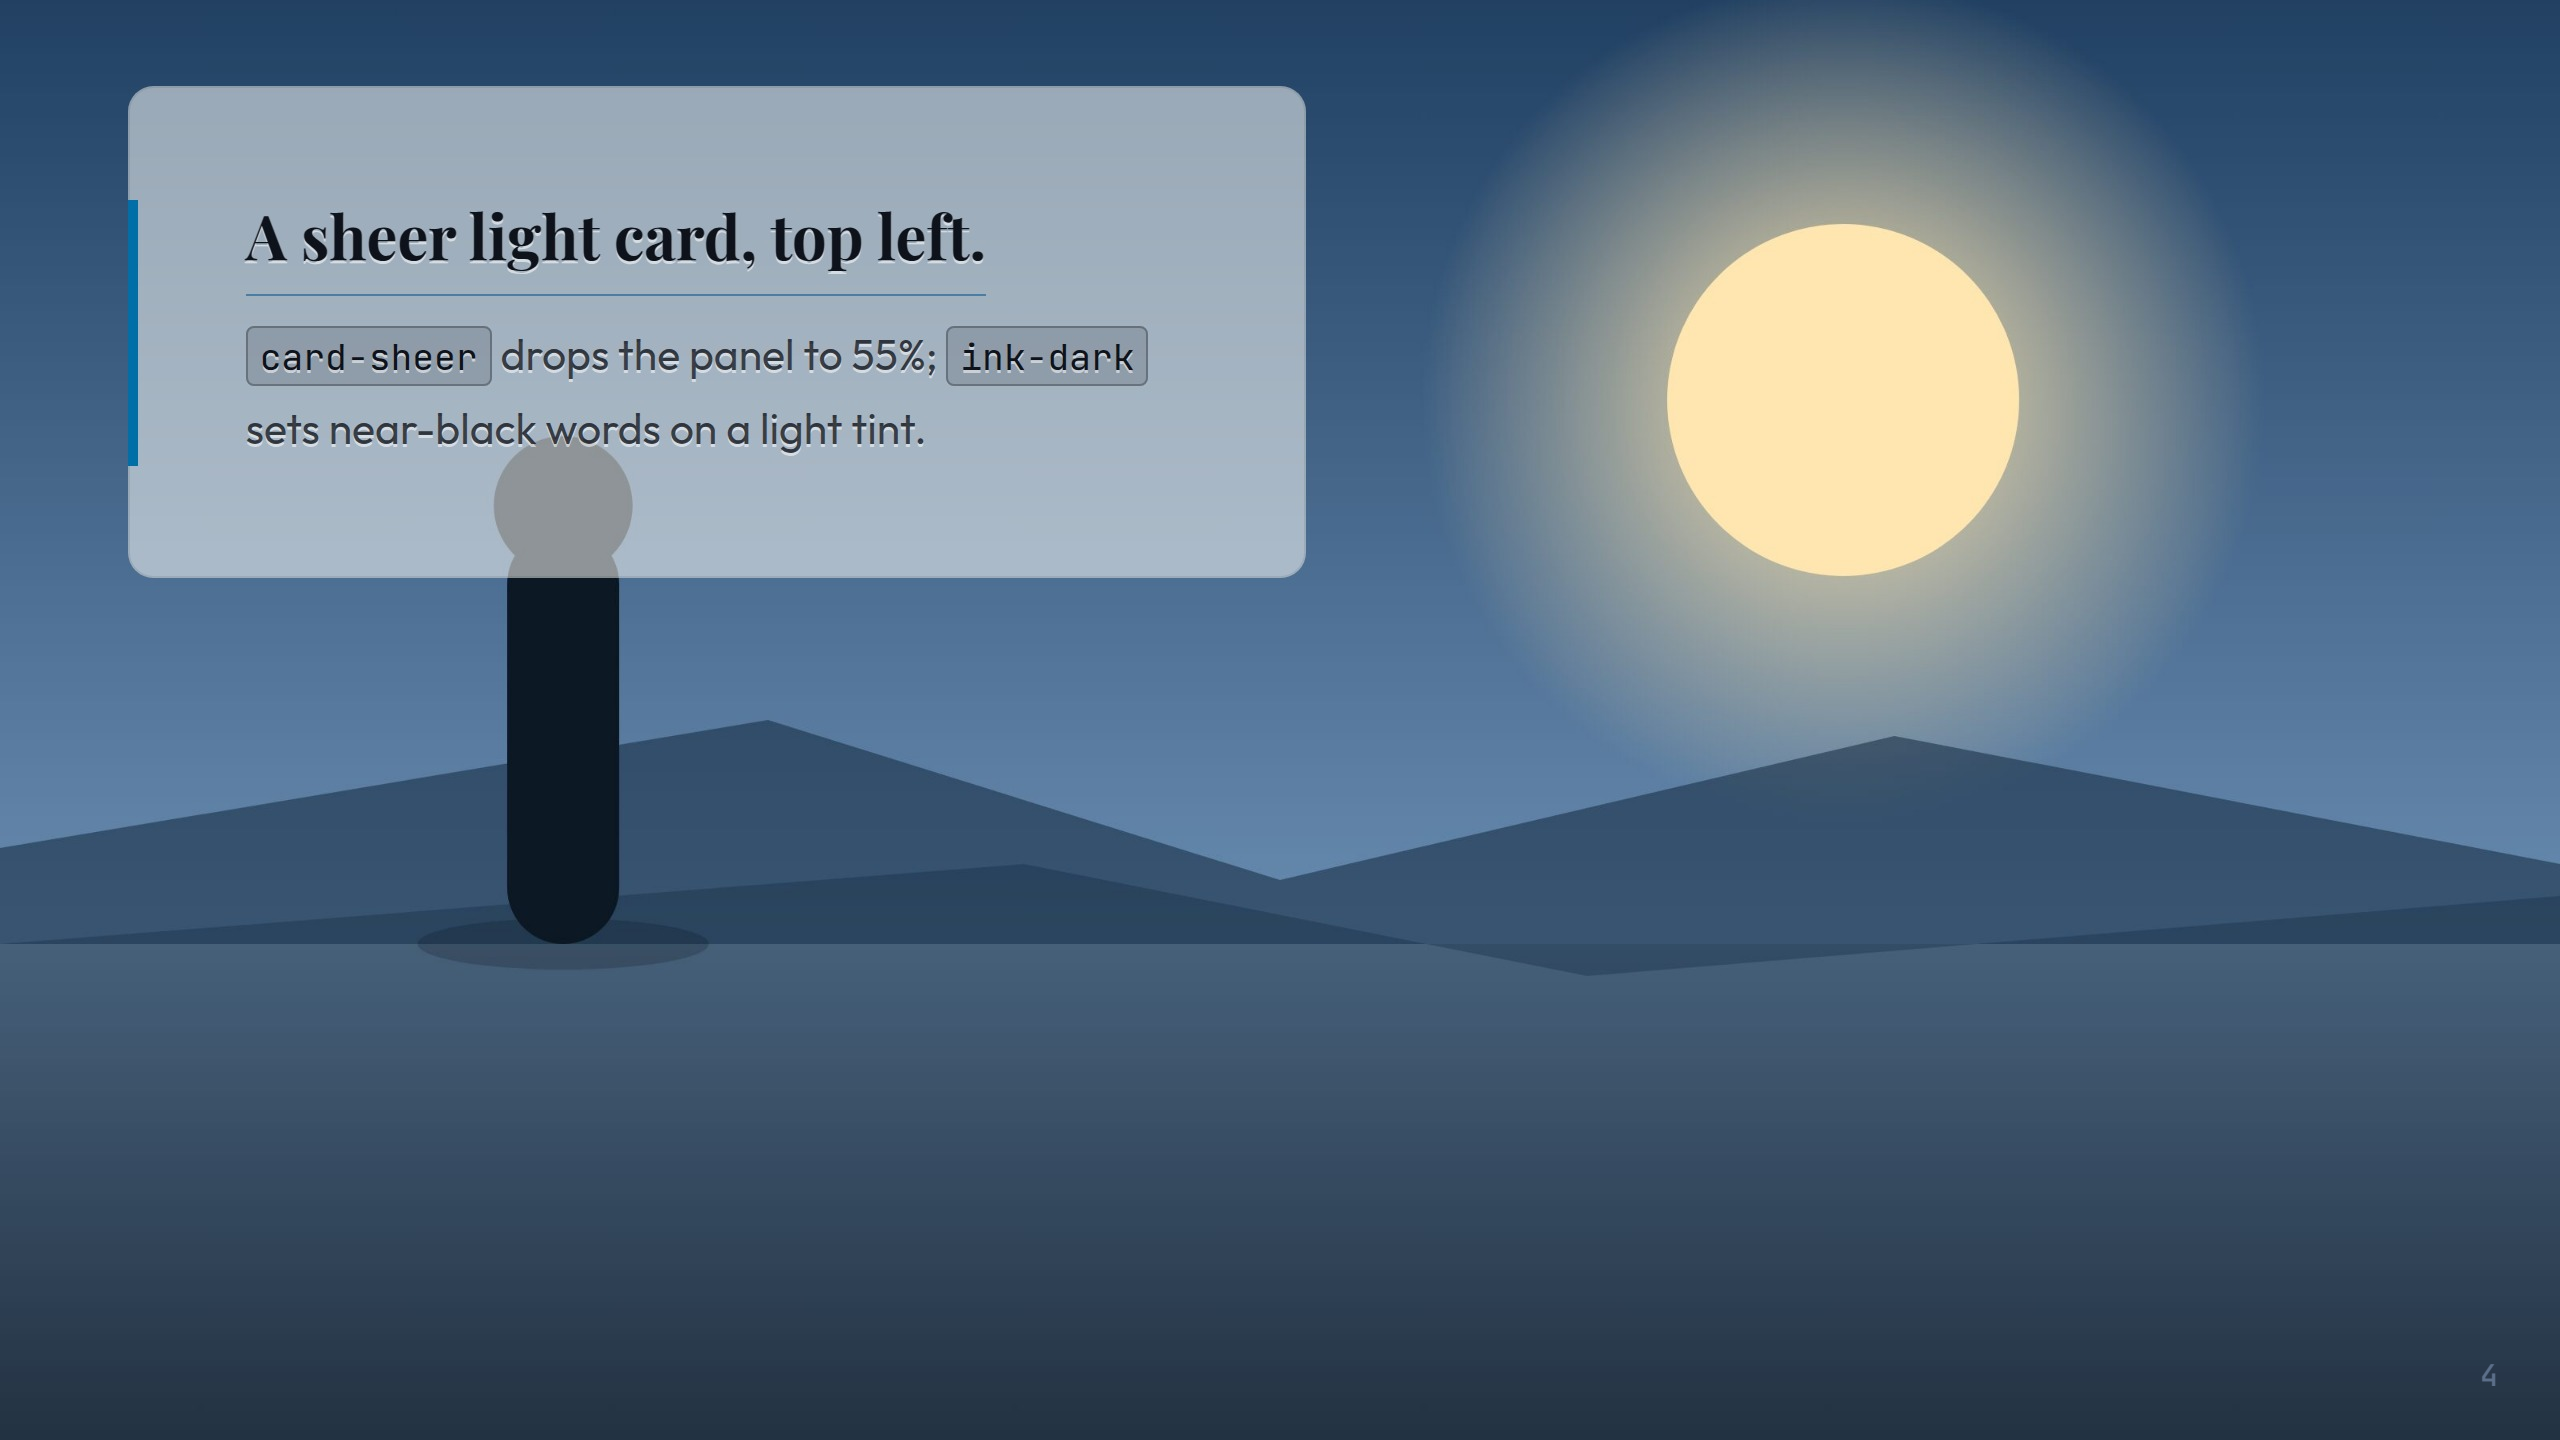

A soft dark card, centered low.

`card-soft` thins the panel to 80%; `ink-light` sets white words on a dark card.

A sheer light card, top left.

`card-sheer` drops the panel to 55%; `ink-dark` sets near-black words on a light tint.

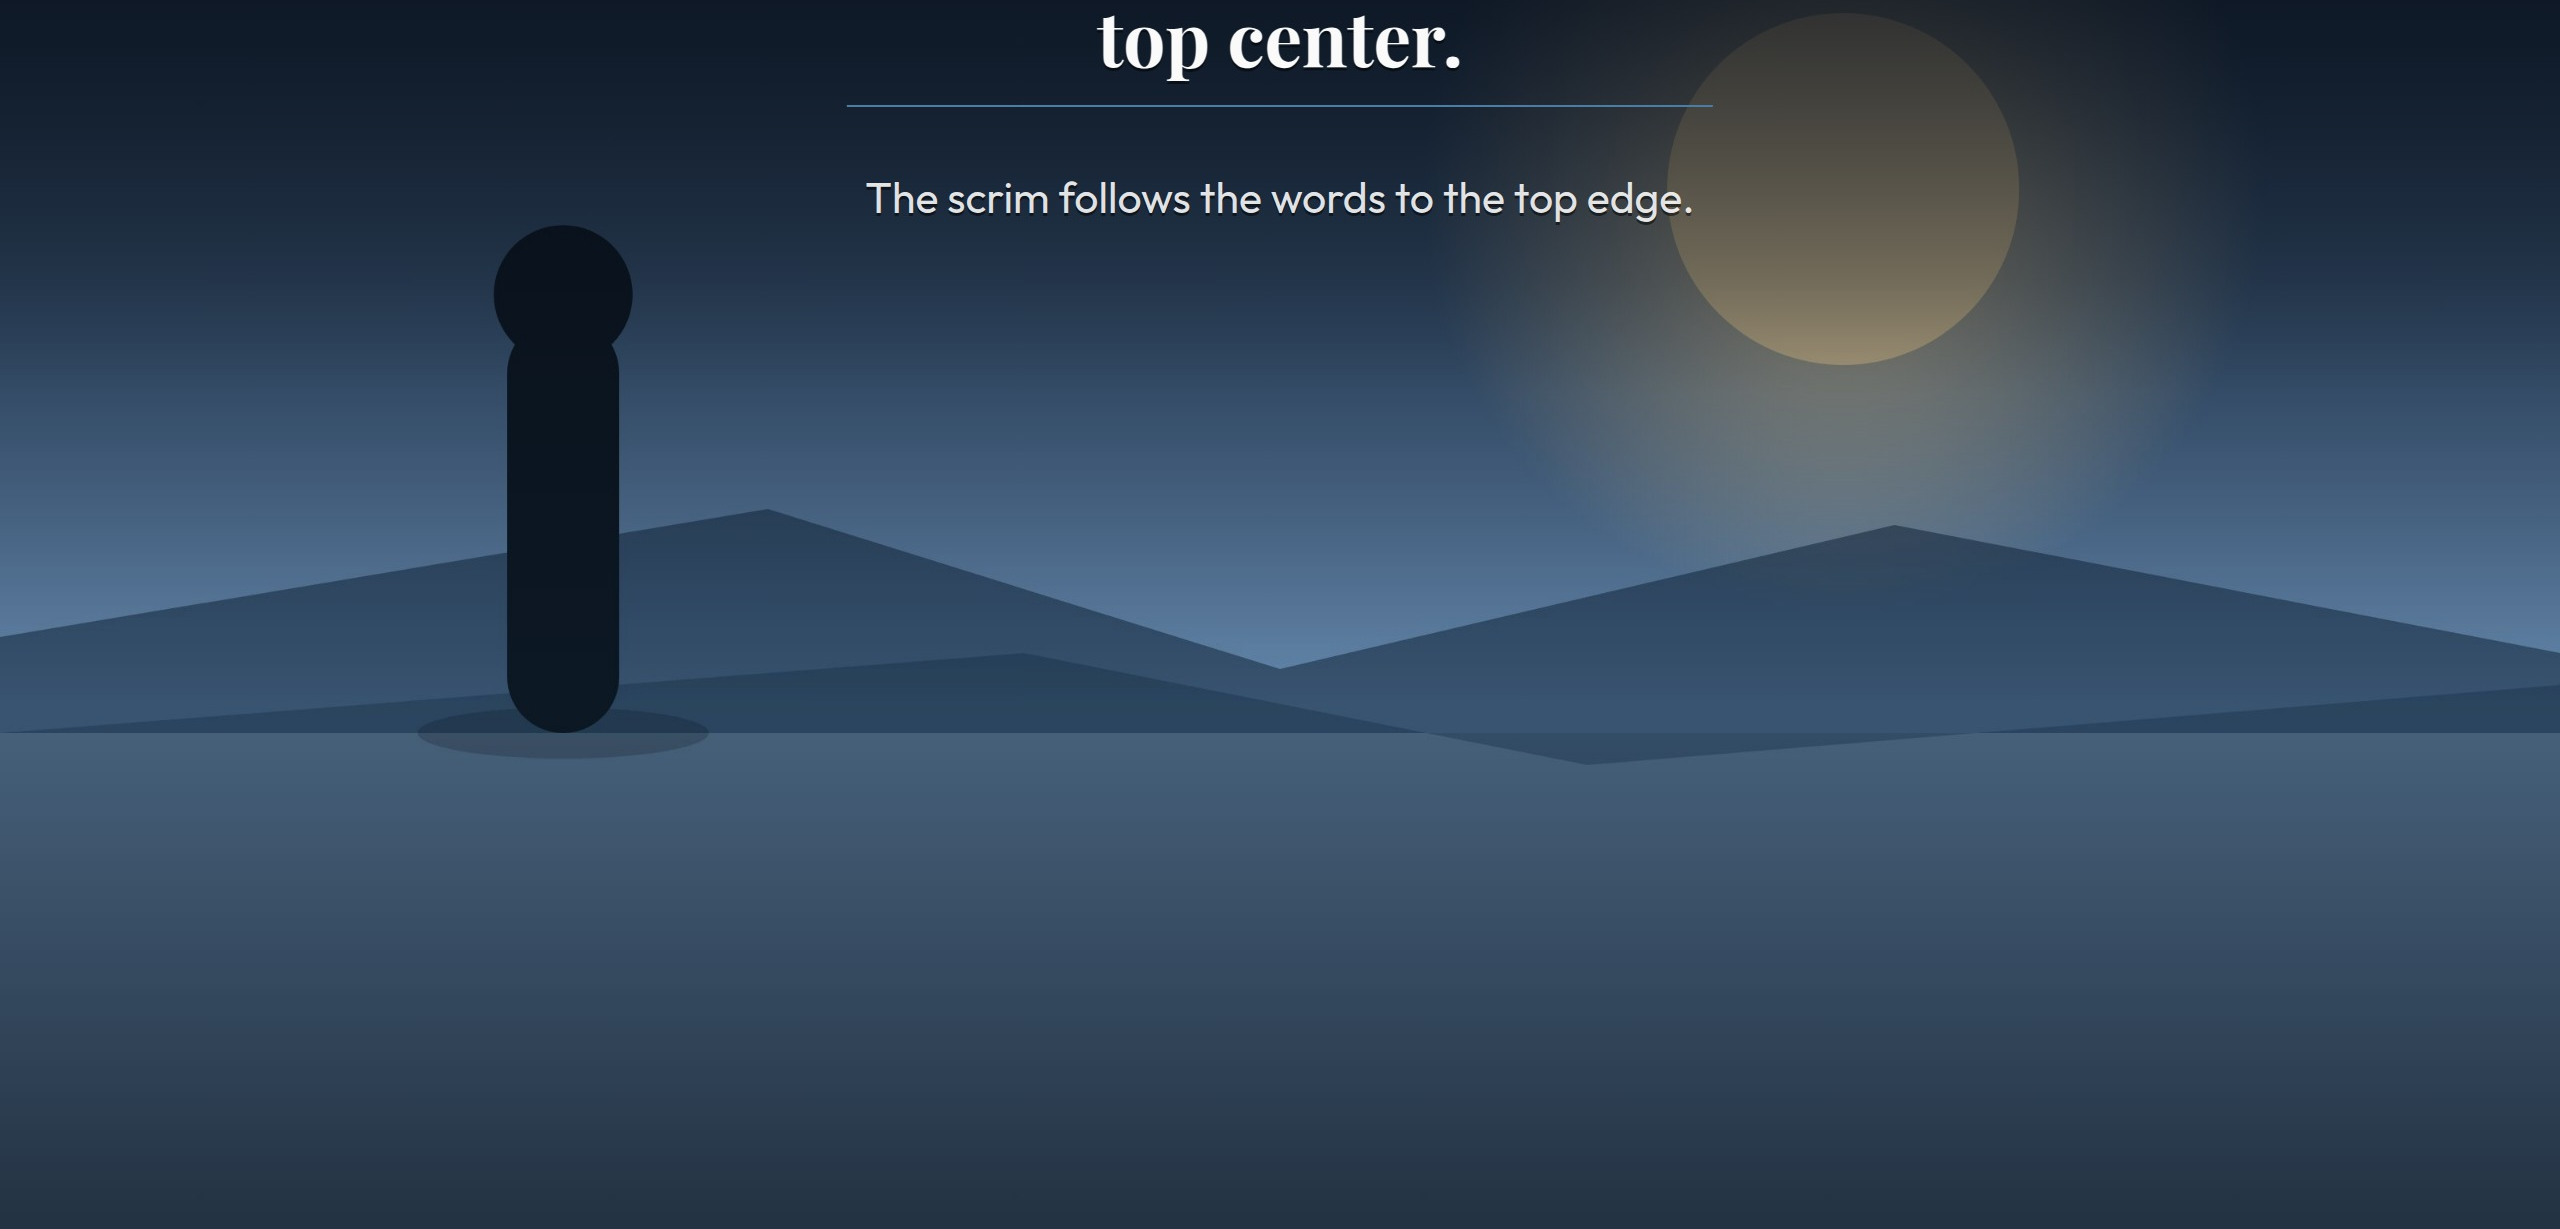

card-lg lets the message lead.

A wider card and a larger heading, centered on the slide.

A discreet title, top center.

The scrim follows the words to the top edge.

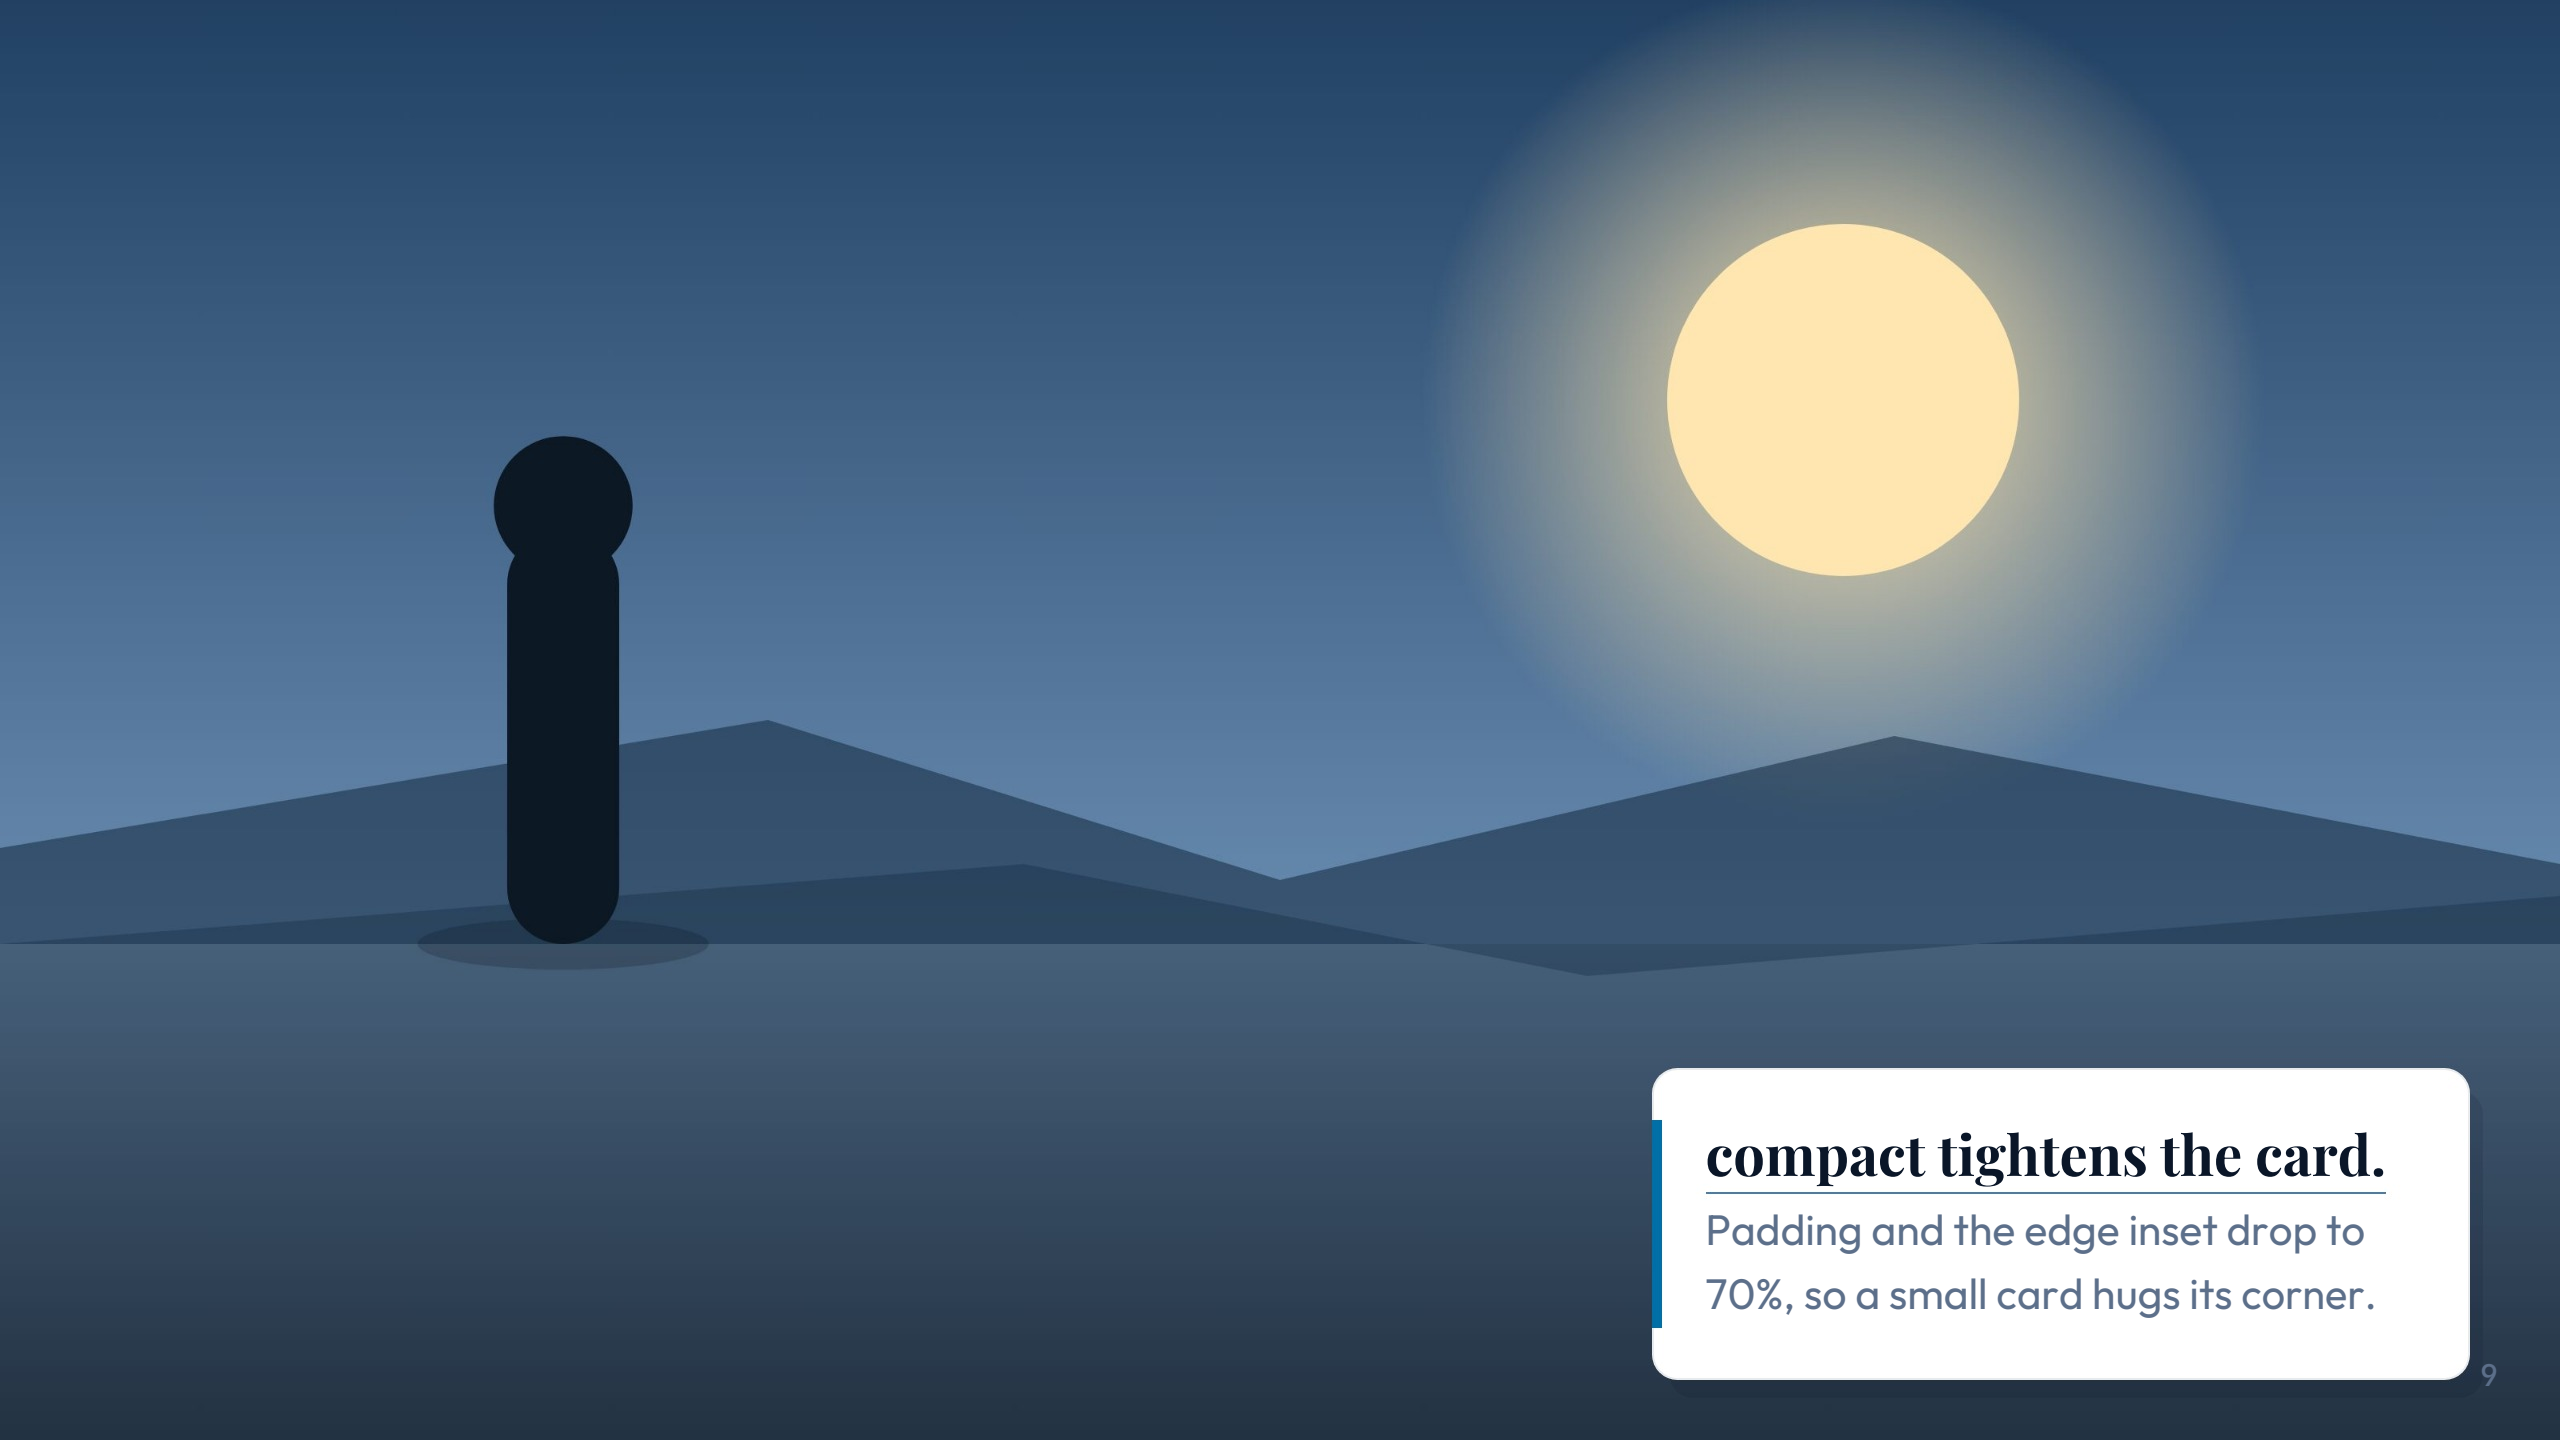

The scrim flips to the right.

`card-sheer` leaves the scrim at 55% strength.

Dark ink on a light scrim.

For a bright photo, the title goes dark and the scrim turns light.

compact tightens the card.

Padding and the edge inset drop to 70%, so a small card hugs its corner.

A compact statement.

The title settles closer to the corner and the body tightens.
