Chart form kernel · bar, quadrant, risk-matrix, radar

A chart is a Lattice

On a page read on a phone, the kernel draws each chart once, on a canvas the shape of its box: the plot, its axes, its key and its notes each take the room their text needs at its role size.

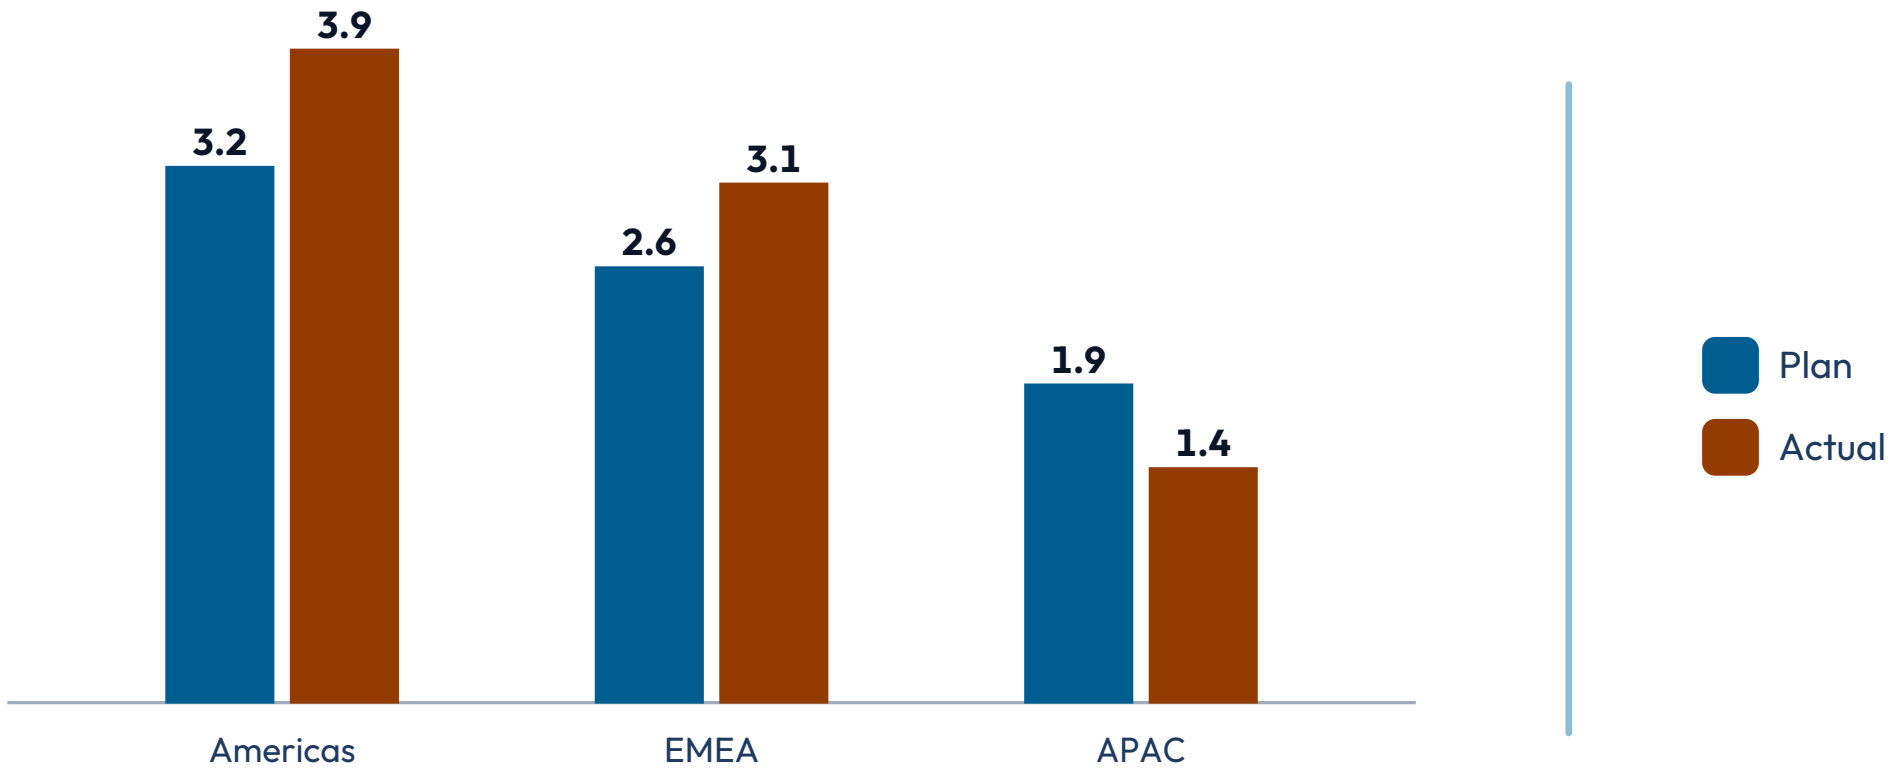

Revenue · FY26

Growth is concentrated in two regions.

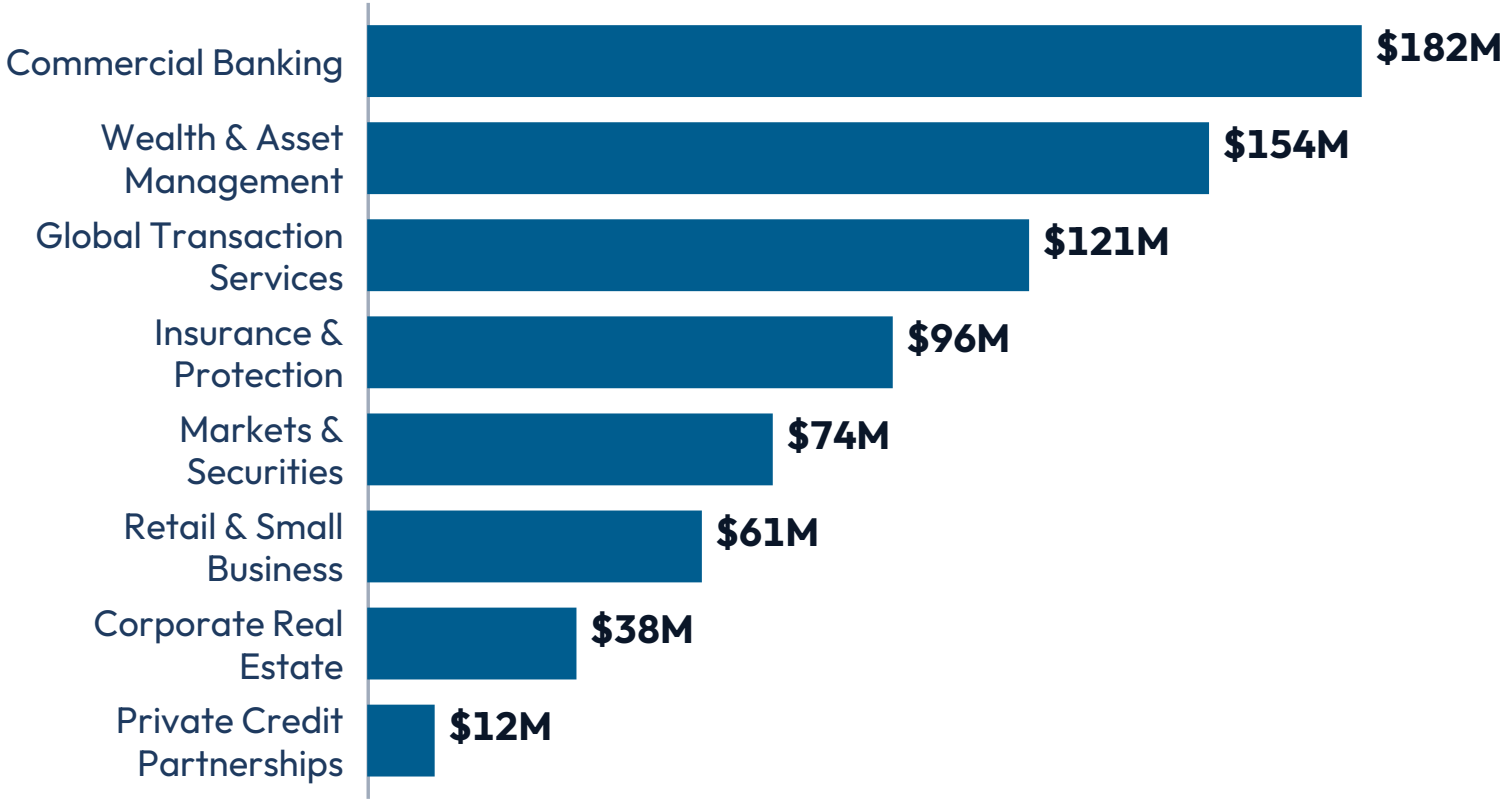

bar · the category band is as tall as its names: North America sets whole on two lines.

We beat plan everywhere but APAC.

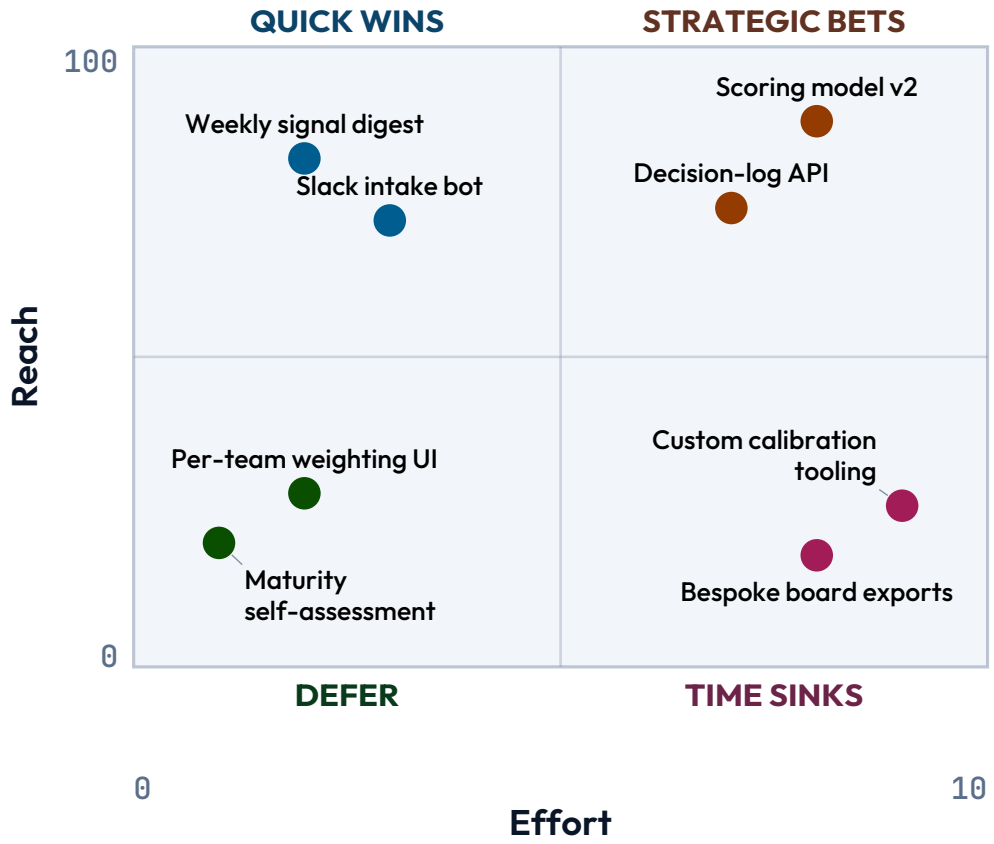

bar grouped · the key is a tile the kernel places under or beside the plot.

Every unit named in full, nothing abbreviated.

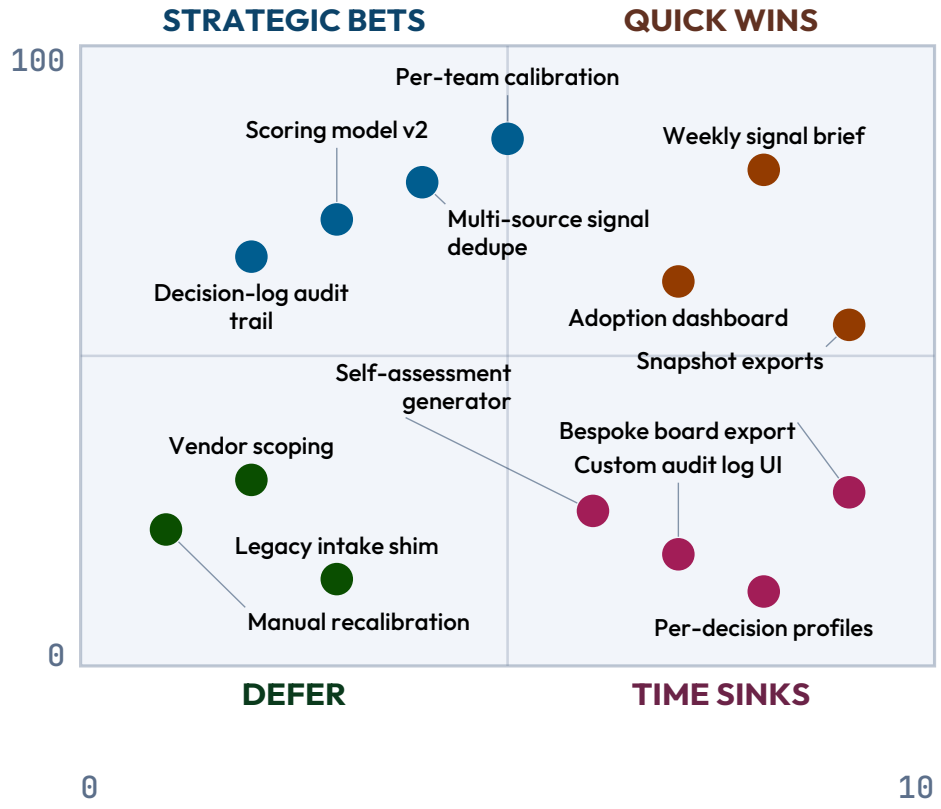

bar row · the name column widens until every name sets whole.

The quadrant scatters items on two axes.

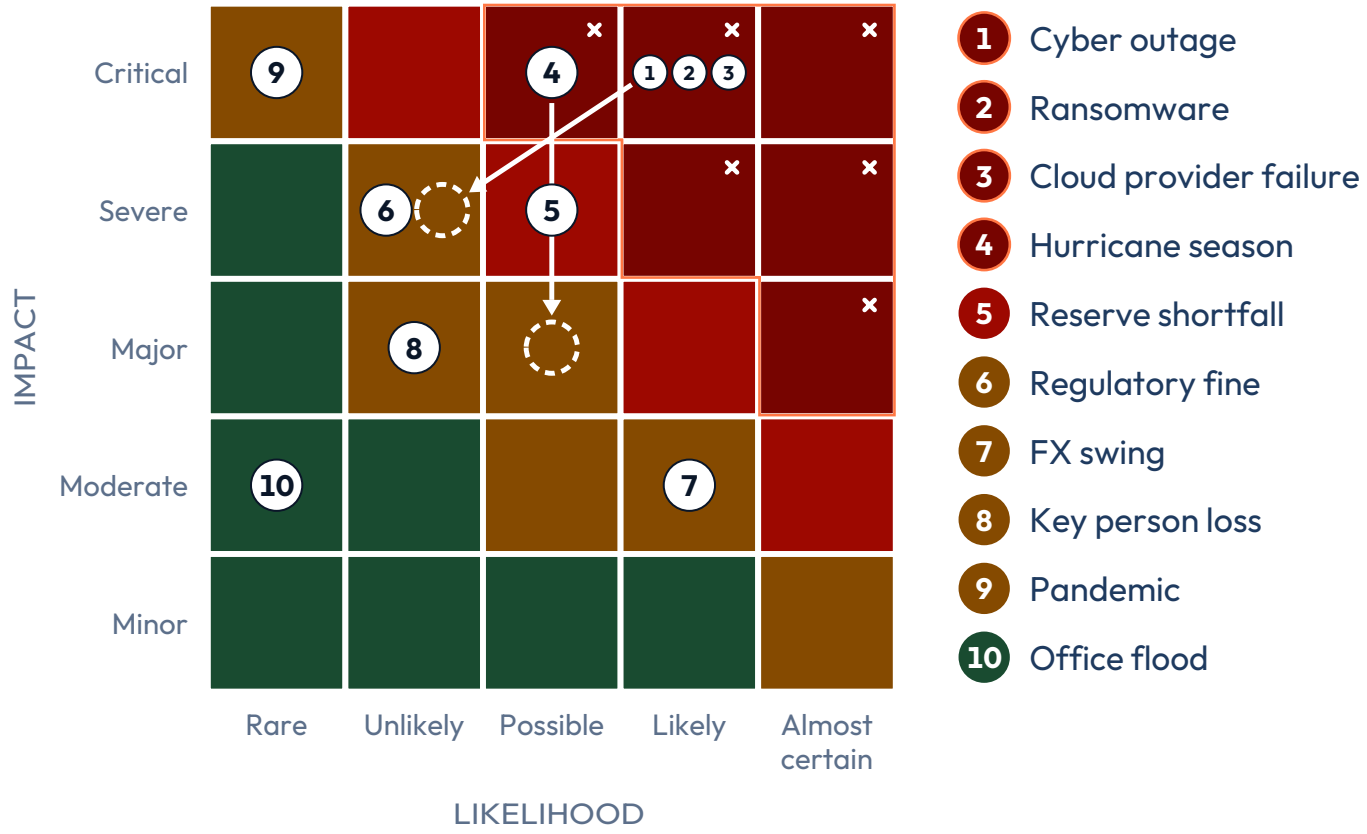

quadrant · names sit on their dots while they can, and move to a numbered key when they cannot.

Fourteen initiatives, one owner.

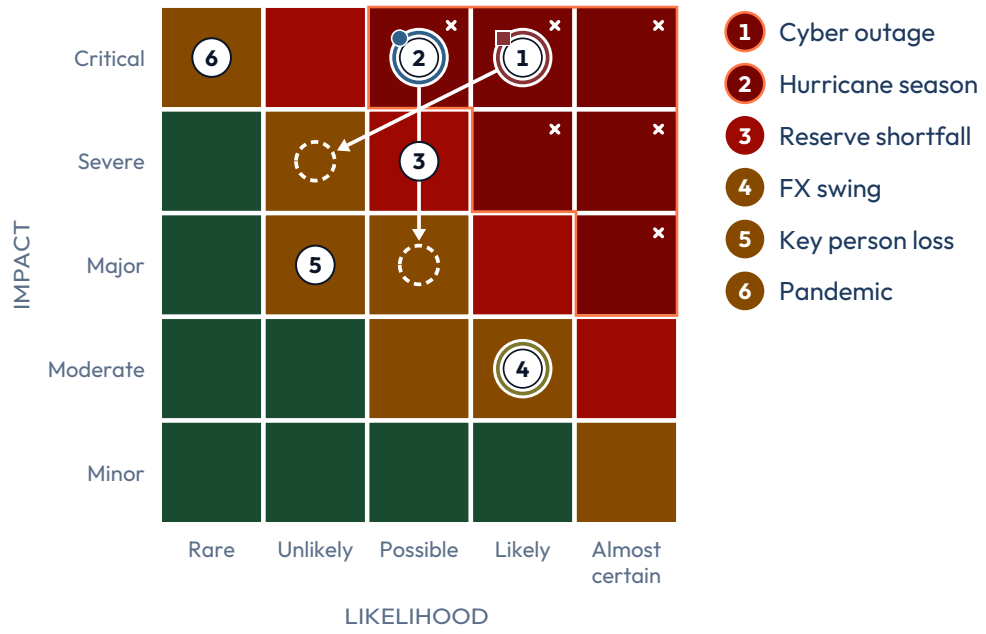

quadrant · fourteen names cannot sit clear of their dots: each dot carries its number.

Ten risks, three in the same cell.

Enterprise risk register · Q4 2026

Cyber and hurricane risk sit in the red; both have a plan.

1 Reinsurance caps the loss

2 Plan cuts likelihood to unlikely

3 Unhedged since March

Vendor scorecard · 2026

Meridian leads on performance and security.
