

LATTICE • SOCIAL FORMATS

Boardroom decks, feed-portrait.

Native 4:5 portrait — the most real estate
the Instagram and Facebook feed allows.

WHY IT MATTERS

9:16

The aspect ratio
that owns the
mobile feed.

Lattice now
renders it natively
— no cropping, no
export
gymnastics.

THE IDEA

One deck source. Every surface it needs to live on.

Set the `size:` directive in the front matter and the layouts adapt to the taller canvas — type scales up to read at phone distance, content fills the frame instead of clinging to the top.

FORMATS SHIPPED

Four new sizes, one directive.

1:1
SQUARE

4:5
PORTRAIT

9:16
STORY

9:19.5
MOBILE

“

The best deck is the one that meets your audience where they already are — and right now, that's a phone held upright.

”

— SlideWright field notes

SECTION 02

Authoring
stays exactly
the same.

Pick the canvas with `size:` — and nothing else moves.

Set `size:` to `story`, `square`, `portrait` or `mobile` in the front matter. Components, palettes and treatments all work unchanged — the layouts simply adapt to the taller frame.

ONE LINE OF FRONT MATTER — AND YOU'RE FEED-
READY.
