

TYPOGRAPHY · PROJECTION SCALE

Bigger type, same frame

A slide too full for the scale steps down. It is never clipped.

Agents can now take a ticket all the way to review.

SO WHAT

Five steps do not fit at 1.3x, so this slide renders at the next size down.

HOLDS THE FULL SCALE · LIST-STEPS

Four steps fit at the deck's full size.

STEP 01

Plan

Reads the ticket
and plans the
change.

STEP 02

Build

Writes code and
tests, opens a
pull request.

STEP 03

Fix

Fixes whatever
breaks the build.

STEP 04

Hand off

Waits for
approval, leaves
notes.

SO WHAT

The same strip with one step fewer keeps the full 1.3x.

AI raises your floor, but only you can raise your ceiling.

THE FLOOR

Anyone can now produce working-looking code in minutes. That part got cheap, for everyone.

THE CEILING

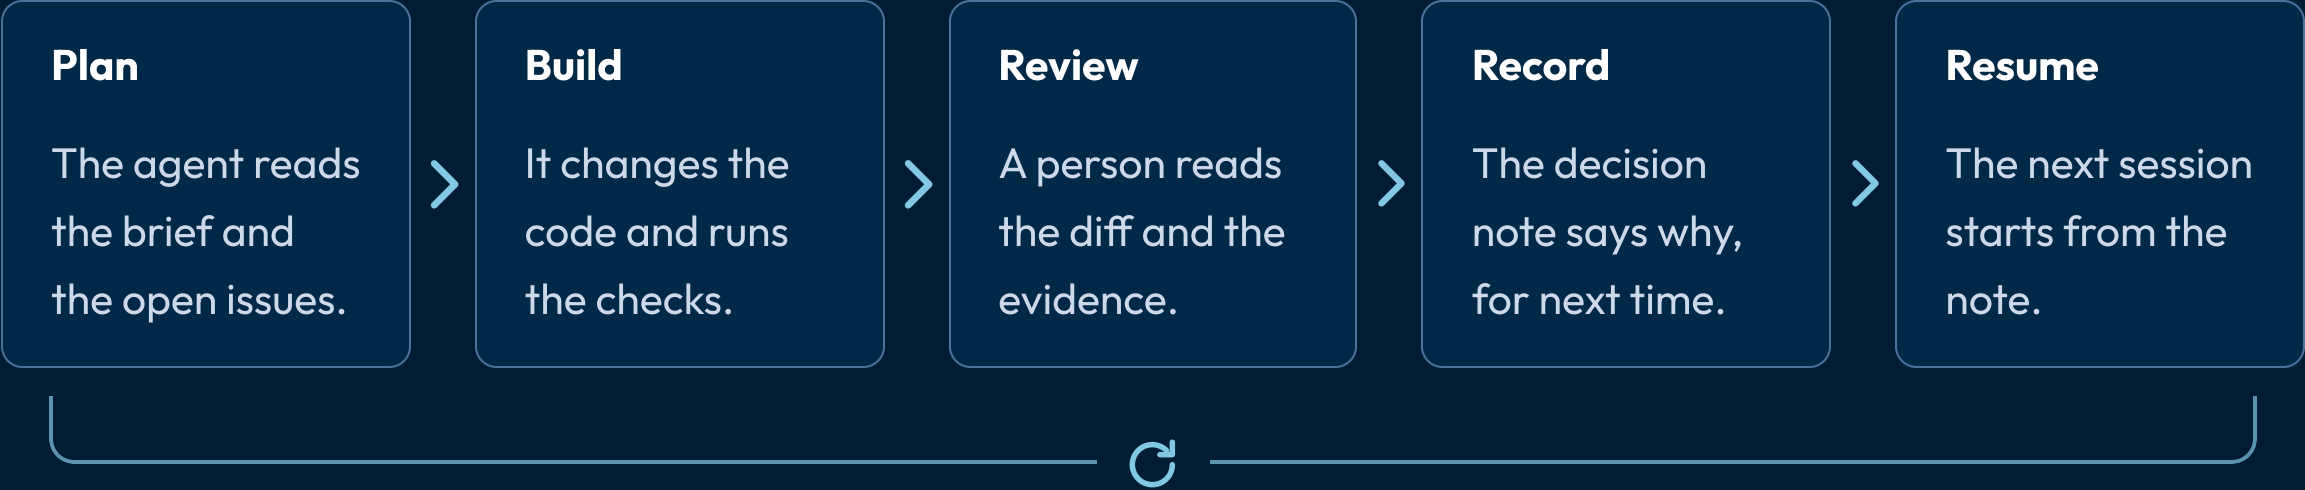

Knowing what to build, spotting what is wrong, deciding when it is good enough. That part is still yours.

SO WHAT

Wrapped prose grows on both axes, so this pair steps further down than a list does.

STEPS DOWN · CYCLE

Every session feeds the next one.

KEY INSIGHT

The ring keeps its shape; the labels step down until the stages fit.

The instruction file states the rules once.

Always

- Run the tests before you say anything is done.
- Failing test first, then the fix, then the same test passing.
- "Verified" says where it ran and shows proof from there.

Ask first, even when a rule points at it

- Shared state: labels, boards, settings others read.
- The CI pipeline or git hooks.
- A number a person set: "about 12" is a decision.
- The meaning of a core doc, including this file.
- Anything irreversible or public.

HOLDS THE FULL SCALE · CODE

Code keeps scaling; its line budget scales with it.

Always

- Run the tests before you say anything is done.
- Failing test first, then the fix, then the same test passing.

Ask first, even when a rule points at it

- Shared state: labels, boards, settings others read.
- The CI pipeline or git hooks.
- A number a person set: "about 12" is a decision.
- Anything irreversible or public.

Leave a scannable takeaway behind.

*The QR tile is sized in em, so it grows with
the scale and this slide steps down to hold it.*
