

State chart vs. content we've never seen.

Browser-measured layout: nodes are sized by the real text engine, edges are drawn from measured rects. These slides try to break it.

Single-letter states.

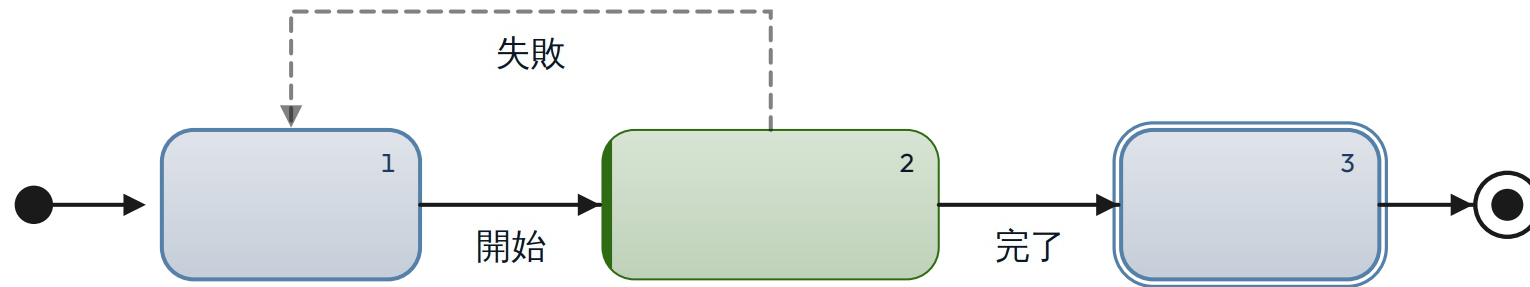

Long state names.

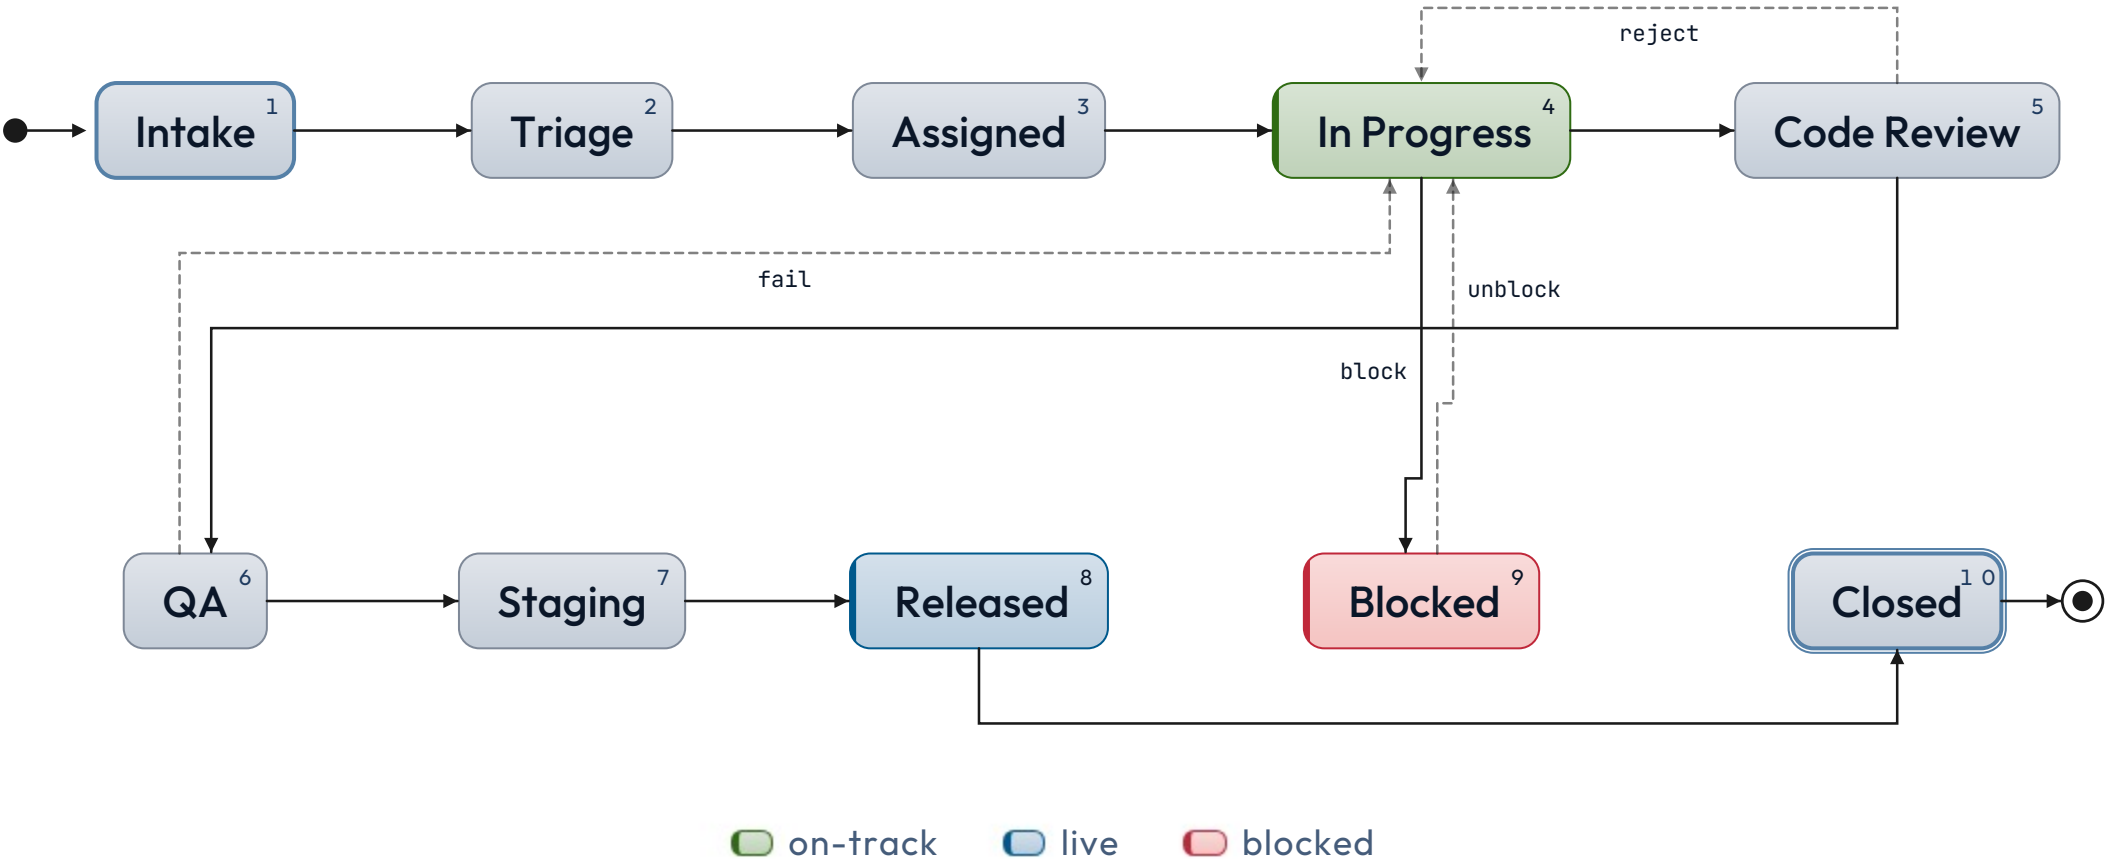

狀態遷移

CJK state labels.

 on-track

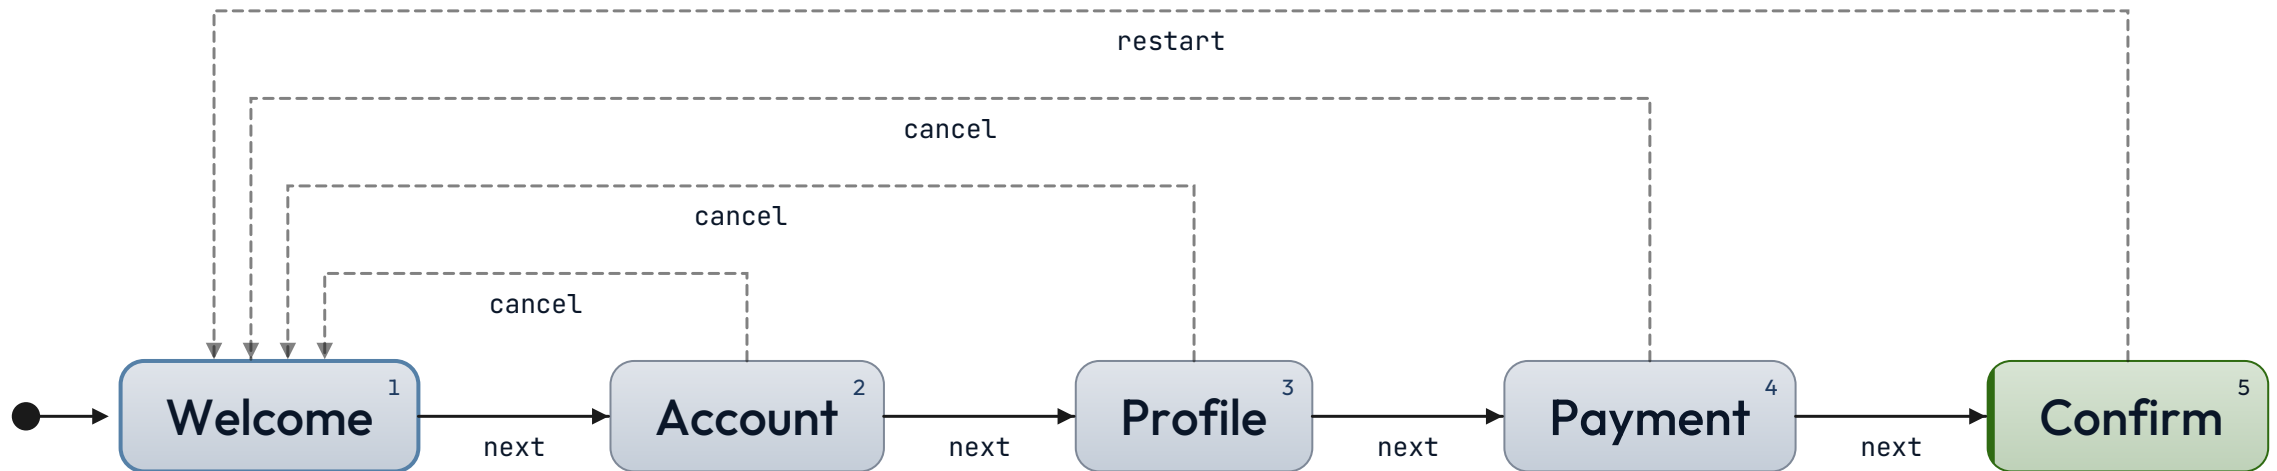

Ten-step pipeline.

Router with many exits.

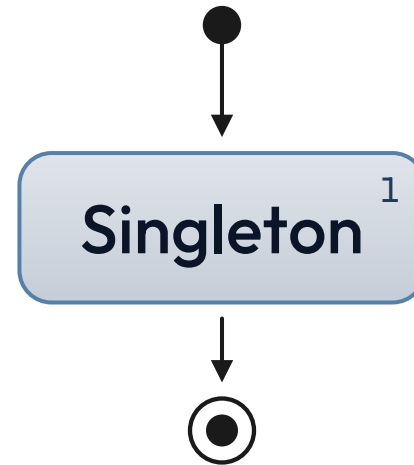

Wizard with escape hatches.

 done

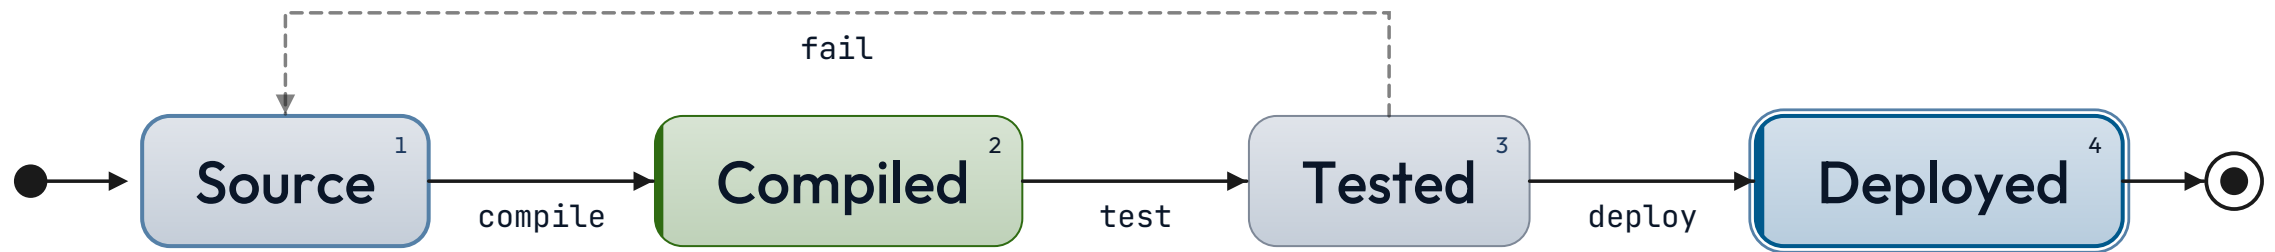

Degenerate: one state.

Status palette across widths.

Left-to-right pipeline.

 on-track  live

Connection (left-to-right).

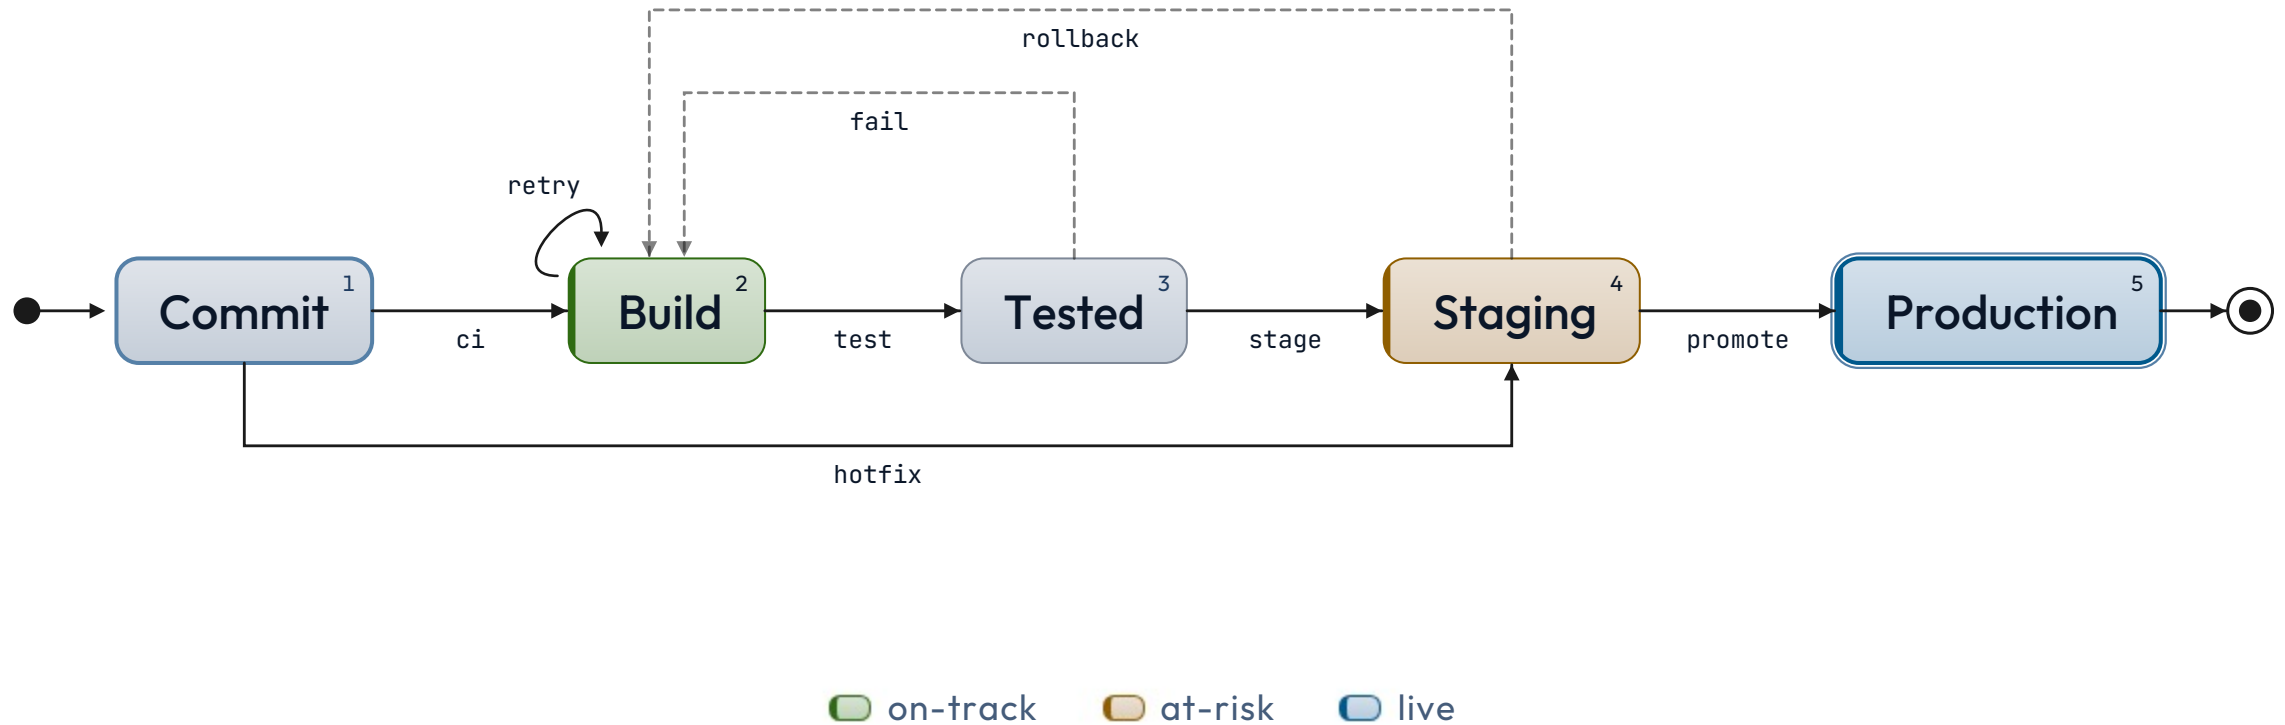

☐ live

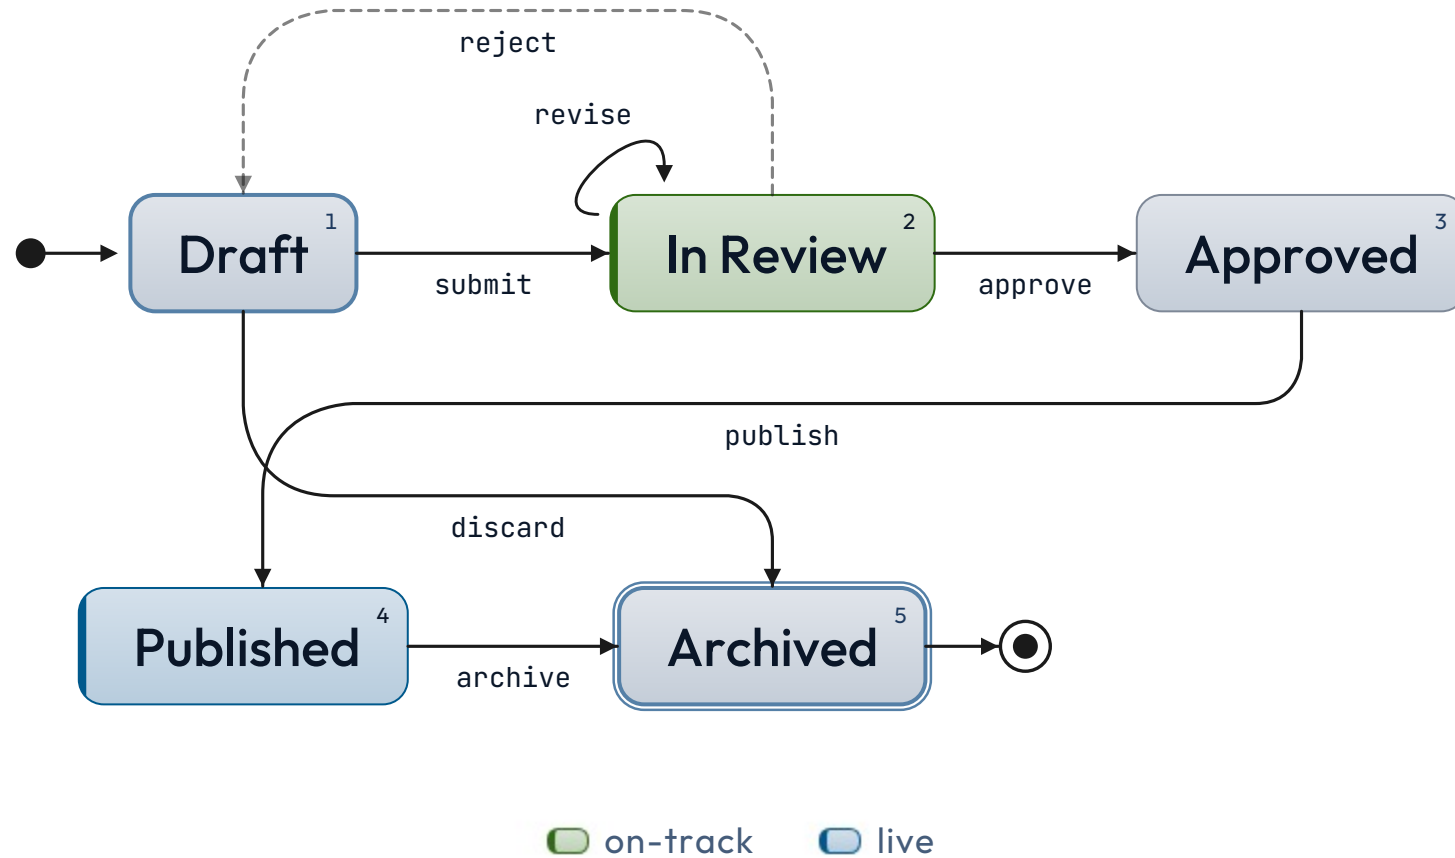

Incident response.

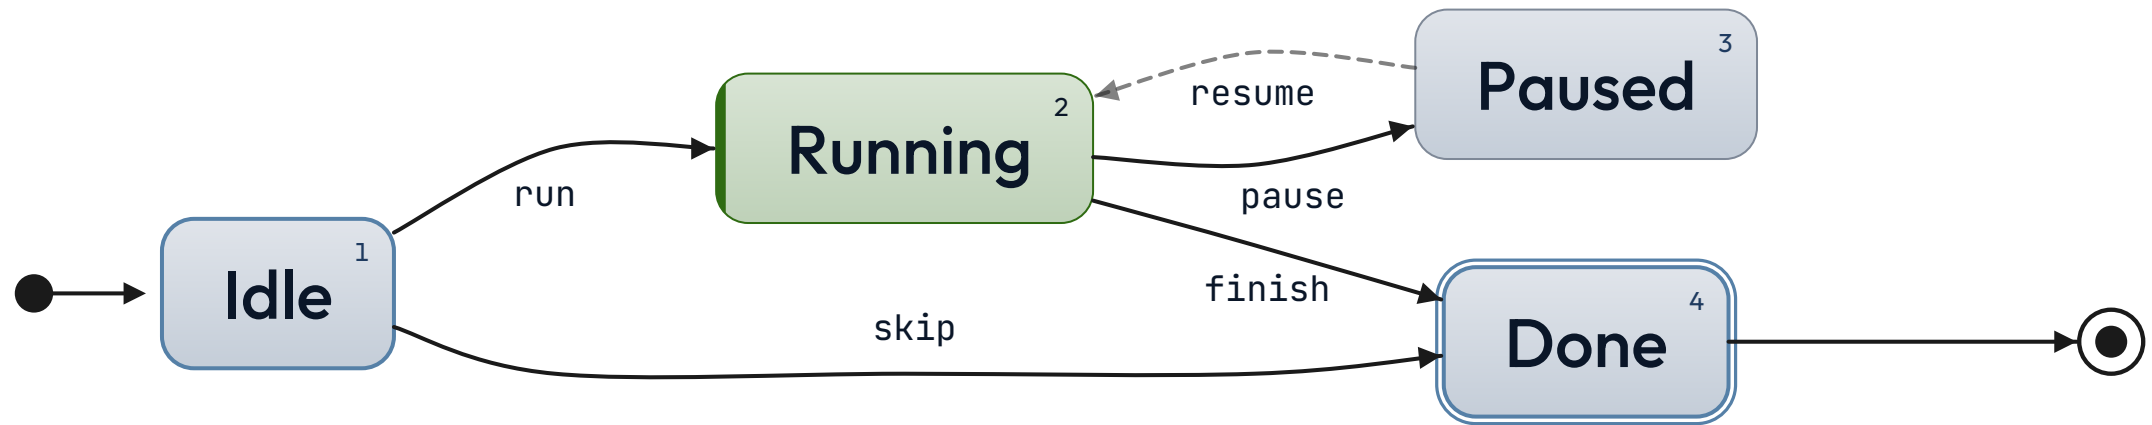

Build & release graph.

Document approval (curved).

Job runner (curved, lr).
