

CHART · KANBAN

The kanban board, recomposed.

Colour now serves the decision — **status** — not decoration. The default board is calm; category coding is there when you ask for it.

PHASE 2 • SPRINT 14

Default — a calm grid where the flag is the focal point.

DELIVERY • WEEK 30

keyline — category coding, disciplined to one edge.

DELIVERY • WEEK 30

tinted — colour tracks the pipeline, left to right.

Status holds up under load — three flags, instantly visible.

KANBAN • DEFAULT • KEYLINE • TINTED

One board, three readings.

The default spends colour on what's in trouble. `keyline` adds ownership; `tinted` adds stage. Pick the one the room needs — the markup never changes.
