When NOT to reach for authority-chain.

Flat list of citations

If the rows have no tier hierarchy, use `list-criteria` or `regulatory-update`. authority-chain earns its chrome only when the descent from statute to case is the point.

Missing citation chip

The inline-code citation is the row's anchor; without it the gloss reads as opinion. Always cite, even for guidance and case rows.

Out-of-order tiers

The chain reads as a descent: statute first, case last. Reversing it or skipping a tier breaks the metaphor the audience is using to follow you.
