LATTICE · SEGNO PHASE 2

Every inline value is now one record.

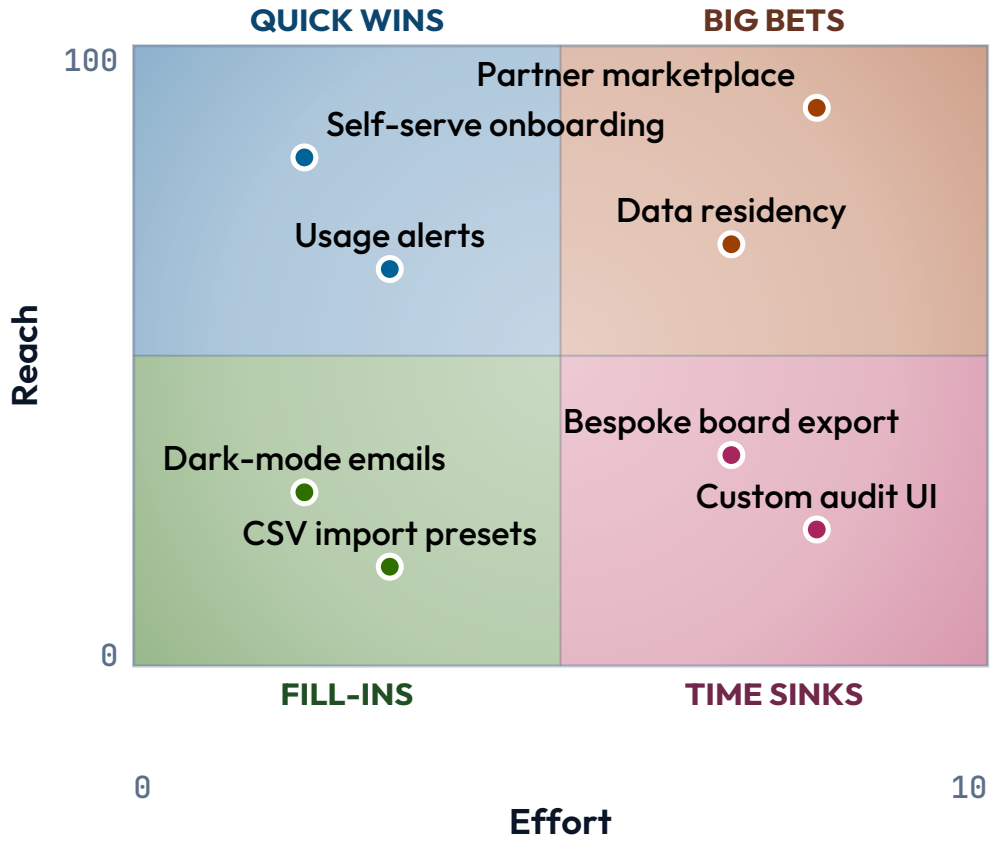

Braces hold the value, commas separate what describes it, and the order is free.

The release train, by workstream.

01	**Settlement engine**	Shipped and load-tested	STABLE 
02	**Ledger migration**	Cutover paused for review	PARTIAL 
03	**Reconciliation**	Design agreed, not started	QUEUED 

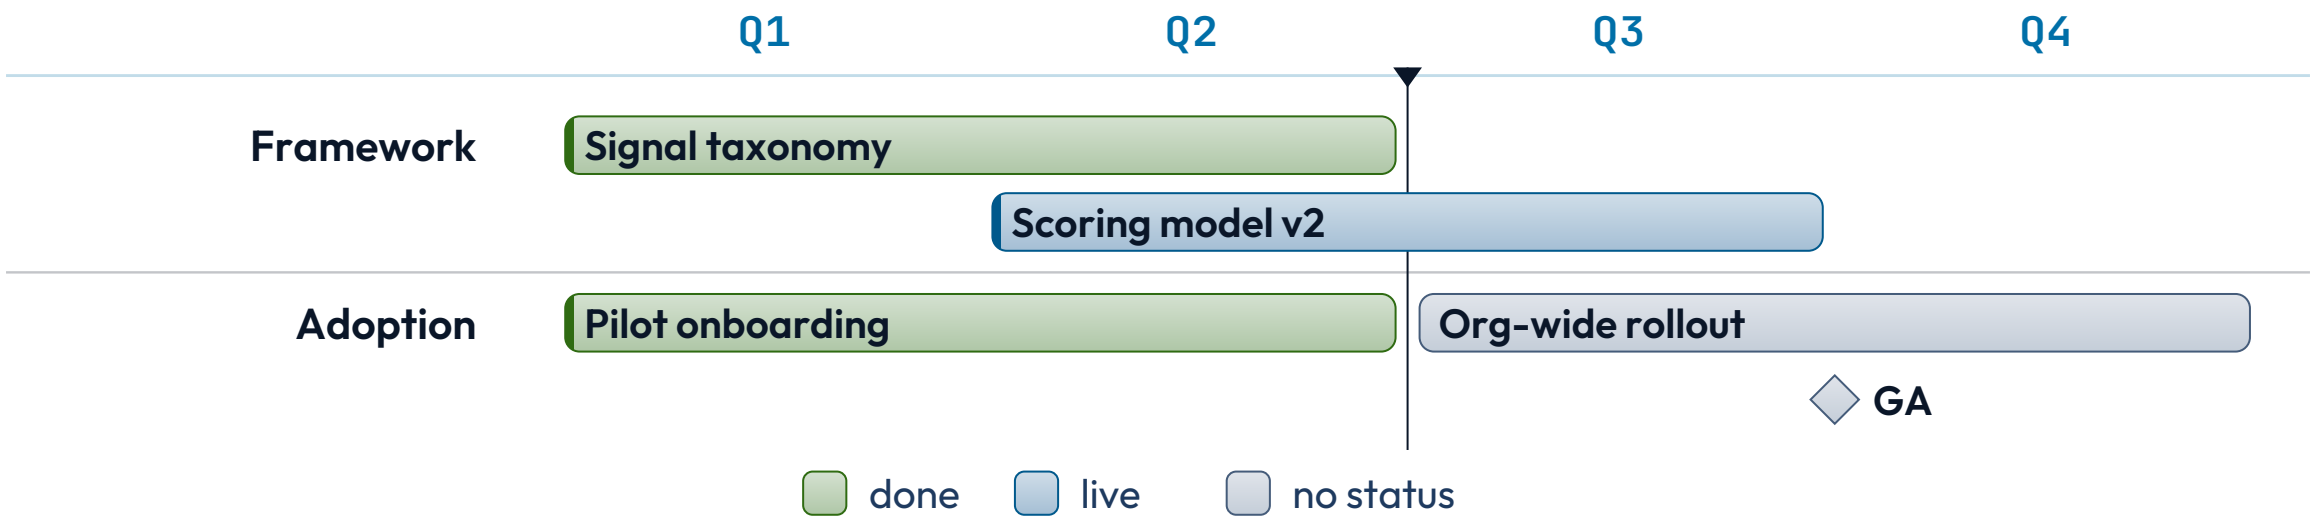

Pills and sparks: the modifiers moved inside the braces.

Where to put the next dollar.

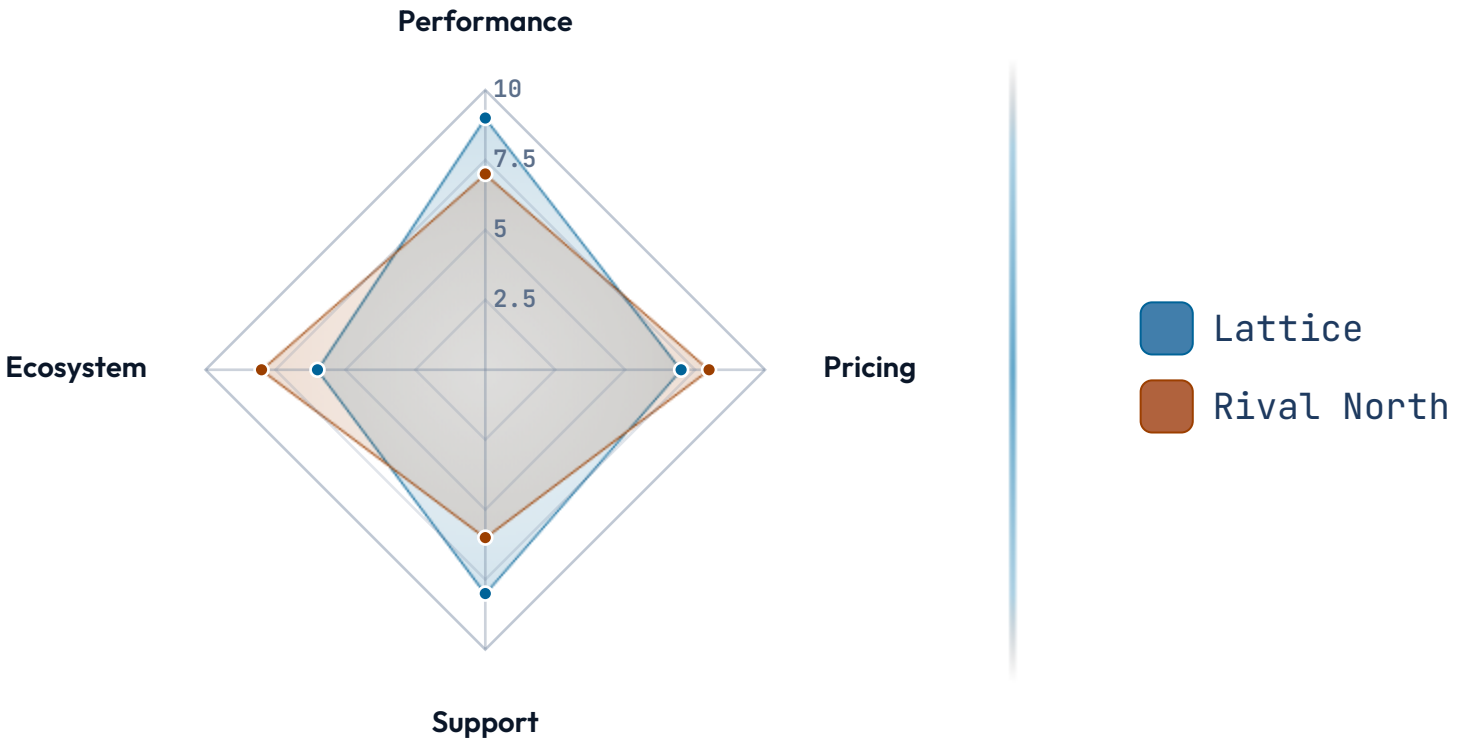

A quadrant point is one record: `{2, 82}` is effort 2, reach 82.

What ships in each phase.

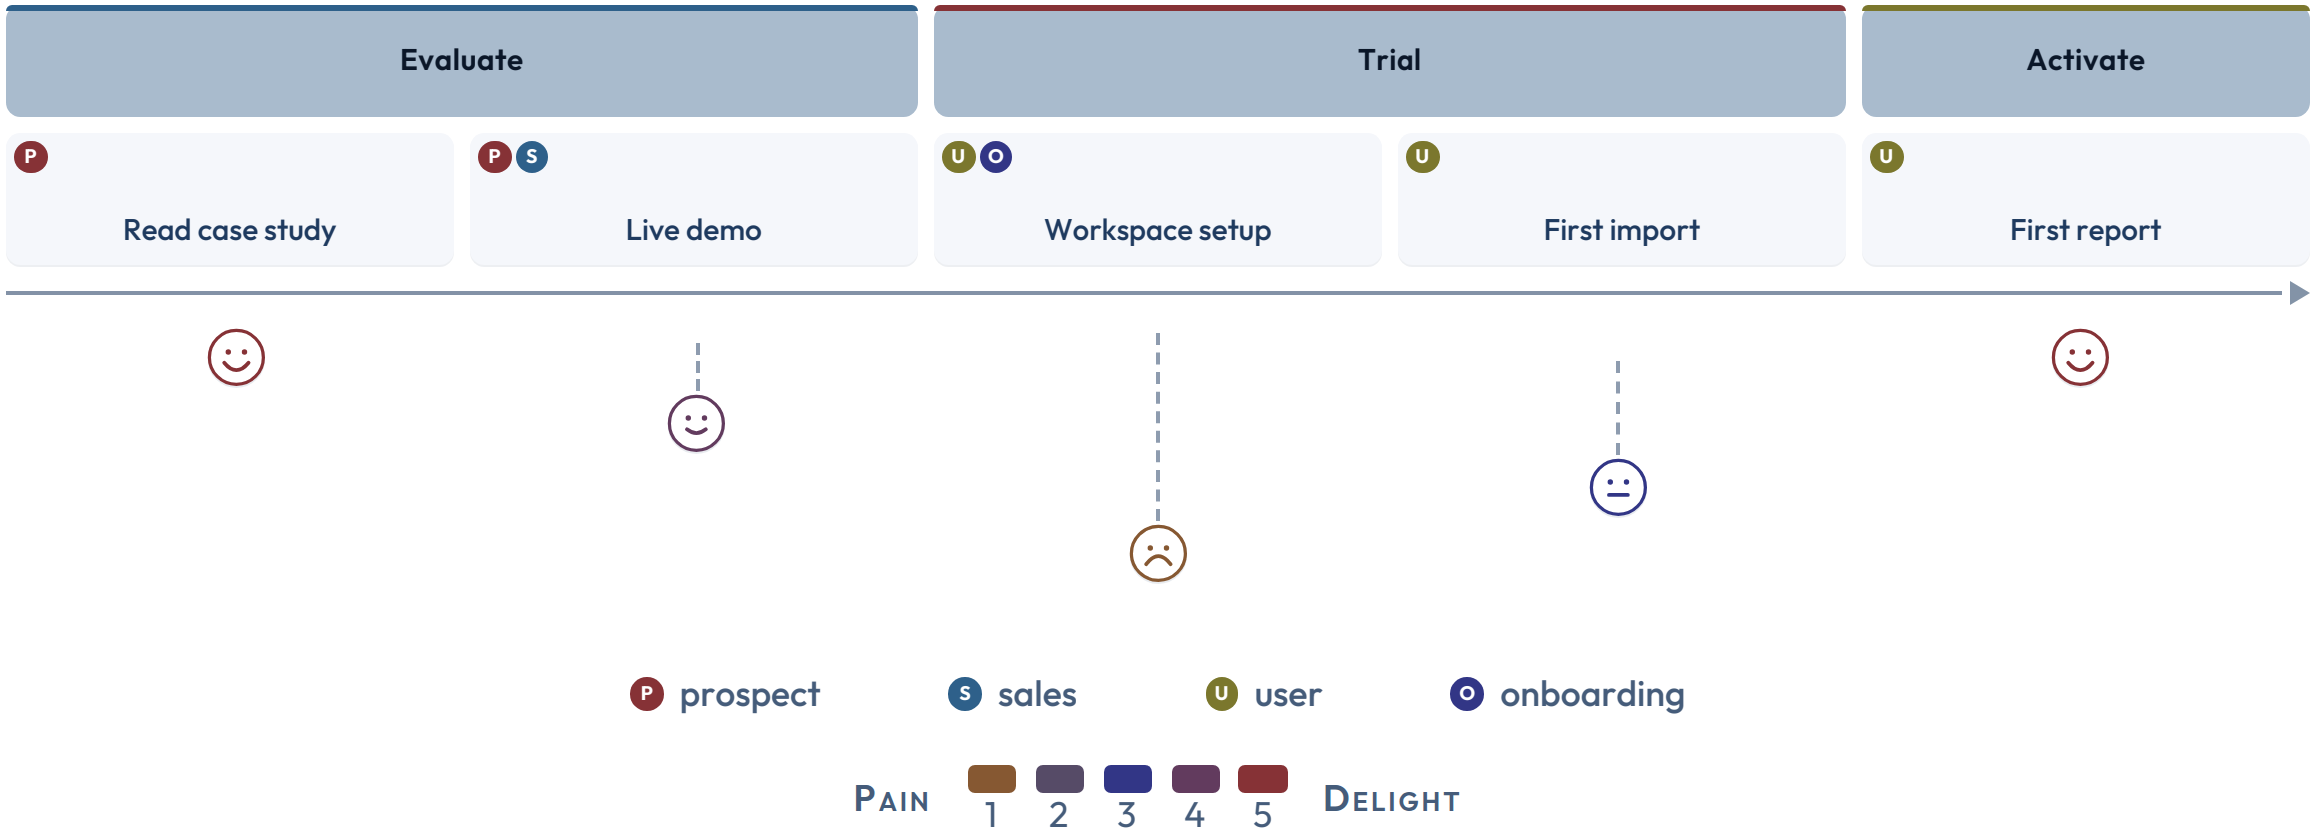

The axis line sets the window and today; a dependency is `after=`.

How we stack up across the buying criteria.

The scale is the axis line; the ring ticks print it.

Walking a new customer to their first report.

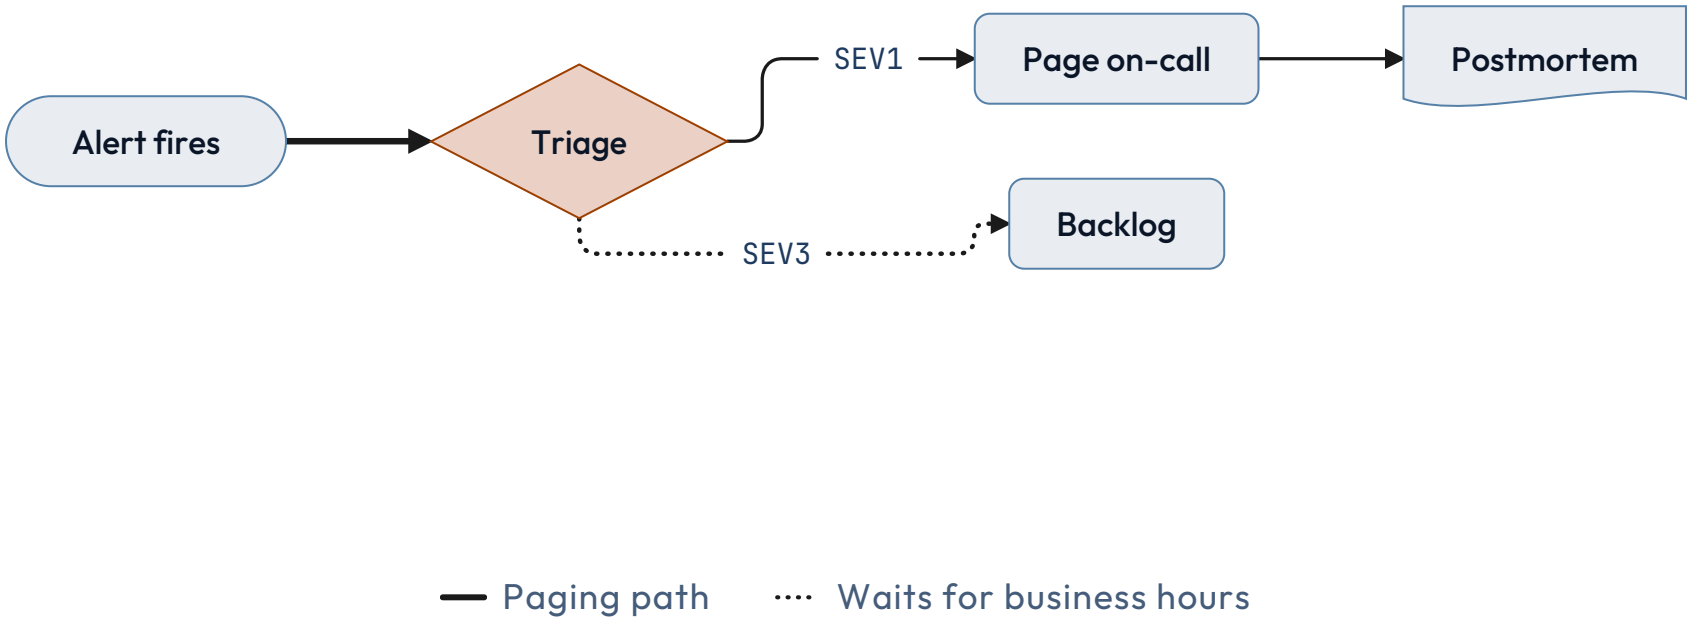

A step is one record: who, how it felt, and how many.

A document moves from draft to published.

A state's style is the flowchart's record: `{start, c1}` is the start, in palette slot 1.

An incident pages a human only when it must.

One notation, one set of rules.

A record is `{value, word, word}`; a named item is `name=value`.

Quote a value that holds a comma: `Draft, v2`.

Every deck in the repo is already written this way.
