2 COMPONENTS

progression

Progression — ordered movement through stages or time.

THE WATER CYCLE

Nothing is spent — only moved.

Evaporation

The sun lifts water from ocean and leaf into vapor.

Condensation

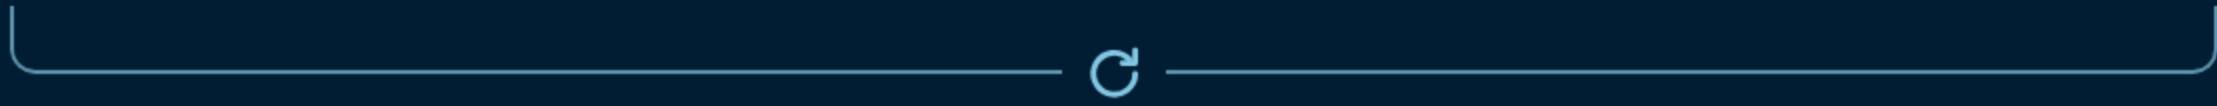
Vapor cools into cloud, a reservoir held aloft.

Precipitation

Rain and snow return the water to the ground.

Collection

Rivers gather it back to the sea, and it begins again.



Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and one clause of body.

STEP 02

Keep steps parallel

Same shape every step, or sequence breaks.

STEP 03

Number honestly

Order is the promise this layout makes.

STEP 04

Stop at five

Six fits; seven is two slides.
